Preventing Toll Fraud

“Toll fraud” is the unauthorized use of your telecommunications system by an unauthorized party (for example, a person who is not a corporate employee, agent, subcontractor, or is not working on your company's behalf). Be aware that there may be a risk of toll fraud associated with your system and that, if toll fraud occurs, it can result in substantial additional charges for your telecommunications services.

Avaya Fraud Intervention

If you suspect that you are being victimized by toll fraud and you need technical assistance or support, in the United States and Canada, call the Technical Service Center's Toll Fraud Intervention Hotline at 1-800-643-2353.

NOTE ►

The Record-a-Call feature is not available to all users on all systems. See your System Manager for feature availability and about programming a Call Record button on your telephone.

When on a call you want to record, do the following to begin recording:

- 1 Press the preprogrammed Call Record button.

NOTE ►

If the system detects silence for a period of 15 seconds after you have begun recording a conversation, the system automatically turns off the Record-a-Call feature. The system announces the message is saved. If this happens, you can begin recording again by pressing the Call Record button. When you resume recording, the system saves the new recording as a separate message.
