# **Product Correction Notice (PCN)**

# Issue Date: November 21, 2006 Supplement 4 Issue Date: August 29, 2007 Archive Date: Not Applicable PCN Number: 1585P

#### **SECTION 1 - CUSTOMER NOTICE**

This PCN address issues<br/>with the following<br/>products and systems:Avaya S8xx0 (excluding the S8100) series Servers running<br/>Communication Manager 1.x, 2.x, 3.x, and 4.0 software releases.

**Does this PCN apply to me? August 29, 2007** – Supplement 4 is being issued to clarify which Communication Manager Releases do NOT require a patch for the new daylight saving time rules for the United States and Canada. These releases have the new DST information built into the software.

**March 26, 2007** – Supplement 3 is being issued to include additional daylight saving time patches for Communication Manager Releases 3.1.3 and 4.0.

**March 18, 2007** – Supplement 2 is being issued to include additional daylight saving time patches for Communication Manager Releases 3.1 and 3.1.1.

**February 23, 2007** – Supplement 1 is being issued to include an additional daylight saving time patch for Communication Manager Release 2.1.1.

This PCN specifies patches that support new daylight saving time (DST) rules starting in 2007 for the United States and Canada. Customers with S8xx0 Servers located in the U.S. and Canada must take action to ensure 2007 and later daylight saving time updates occur automatically on Servers.

You do NOT need a DST patch for United States and Canada if you have an S8xx0 Server running Communication Manager with the following releases:

Communication Manager 3.1.4 and later 3.x loads Communication Manager 4.0.1 and later 4.x loads

All future releases of Communication Manager will have the DST changes for United States and Canada built into the Communication Manager software.

There are daylight saving time patches available for the following S8xx0 Servers (excluding the S8100) and Communication Manager releases:

- 1. S8xx0 Servers running Communication Manager 2.0.1 load 221.1 (patch 00.1.221.1-12514.tar.gz).
- 2. S8xx0 Servers running Communication Manager 2.1 load 411.7 (patch 01.0.411.7-12514.tar.gz).
- 3. S8xx0 Servers running Communication Manager 2.1.1 load 414.1 (patch 01.1.414.1-12514.tar.gz).
- 4. S8xx0 Servers running Communication Manager 2.2 load 111.4 (patch 02.0.111.4-12514.tar.gz).
- 5. S8xx0 Servers running Communication Manager 2.2.2 load 122.0 (patch 02.2.122.0-12514.tar.gz).
- 6. S8xx0 Servers running Communication Manager 3.0 load 340.3 (patch

What you should do you receive th	o when	You should install the specified daylight saving time patches if your Server is located, or serves any phones that are located in the United States or Canada.
Description of	of PCN:	This notice specifies daylight saving time patches for Servers to support new 2007 and later DST rules in the United States and Canada.
What is the of th	nature e PCN?	Daylight saving time patches for S8xx0 series Servers.
This PCN add and re the following	esolves	This notice addresses new 2007 and later daylight saving time rule changes for S8xx0 Servers located in, or serving phones located in the United States and Canada.
Class 2=N	1=High	Class 2

Is it required that t be applied to my s		This PCN is not required. However, if this PCN is not applied the time must be set manually on the server when daylight saving time changes occur.
The risk if t is not in		The time on the Server, telephone displays, etc. will be incorrect when daylight saving time changes occur in 2007 and later years.
Is this PCN customers, customers, o	non-US	This applies to U.S. and Canada customers.
Does applying t disrupt my s		Installation of these patches is not service disrupting.
Installation of t is requ	his PCN ired by:	Customer or Avaya Authorized Service Provider. These patches are customer installable and remotely installable.
Release notes and workarounds are located:	If DST patches are not applied to S8xx0 Servers running Communication Manager releases that require patches, a manual procedure is required to update the server time. Refer to the following web page for details on the manual procedure:	
How to determine if your product is affected:	S8xxU series Servers running Communication Manager 1.x, 2.x, 3.x (not 3.1.4 or later) and 4.0 software releases that are serving any phones	
Required m (If PCN customer ins	can be	This PCN is being issued as a customer installable PCN. The appropriate daylight saving time patches (DST) are required. To obtain the DST patches refer to the <b>Provisioning Instructions</b> section of this PCN. <b>NOTE: There are special installation instructions required</b> for the daylight saving time patches. Refer to the Finding the installation instructions section of this PCN.

Provisioning instructions (If PCN can be customer installed):	The daylight saving time patches can be obtained by performing the following steps from a browser:
	1. Go to http://support.avaya.com and click <b>Download Center</b>
	2. Click on <b>Download My Software</b> and login
	3. Click on Latest TN Circuit Pack, Server, and Media Gateway Firmware and Software Updates
	<ol> <li>Click on the appropriate load for the desired DST patch (e.g., 632.1 for DST patch 01.2.632.1-12514) in the Load column of the 2007 Daylight Saving Time Patches for Servers running Communication Manager table</li> </ol>
	5. Download the patch
	The MD5 sums for the DST patches are: 00.1.221.1-12514.tar.gz: 8c040286a2d97f8f09c1b235ac90f529 01.0.411.7-12514.tar.gz: 8cfef0e94229ffb442827b6c6d780940 01.1.414.1-12514.tar.gz: 5ead60121b019c80fc8190c961573ab2 02.0.111.4-12514.tar.gz: 9d77007415133e43a2fe197ff4f3e3b8 02.2.122.0-12514.tar.gz: 17c4b983345cd7beb973d1588174dbfe 00.0.340.3-12514.tar.gz: 0e0b93050e2edef0284ec7fb688a5f9e 00.1.346.0-12514.tar.gz: d1045979bfce540f2e924944719bec28 01.0.628.6-12514.tar.gz: 6e99710b25fdd90a562ee02e2d97084b 01.1.628.7-12514.tar.gz: bff59b3b31935251fa65a502914a7b72 01.2.632.1-12514.tar.gz: 1a86443e5eaee92a70836dd54a065daa 01.3.640.2-12514.tar.gz: 15bd2e7933a59ded9e946da885d52d65

#### Finding the installation instructions (If PCN can be

NOTE: The daylight saving time (DST) patches are special patches designed to be activated on top of existing combo patches or Service Packs. Therefore, these DST patches should be unpacked and activated on top of any patches or Service Packs currently running on the server. In addition, new combo patches and Service Packs can be unpacked and activated on top of these DST patches that are running on a server. The intent is to unpack and activate the DST patch while allowing additional patches and Service Packs to be used simultaneously.

customer installed):

NOTE: Once the DST patches are activated on a server, even if they are deactivated and/or removed, the new daylight saving time rules remain in effect on the server.

NOTE: File synchronization does not work on duplicated servers if all patches and Service Packs are not activated in the exact same order on the active and standby servers!

This PCN is being issued as a customer installable PCN. The patch installation instructions can be obtained by performing the following steps from a browser:

- 1. Go to http://support.avaya.com and click Downloads
- 2. Click on Latest TN Circuit Pack, Server, and Media Gateway Firmware and Software Updates
- 3. Click on **Communication Manager 2.0 and Later Software Update Procedures** to access detailed instructions on how to install the service pack on the Server.

# NOTE: You must follow all of these steps in the order specified. If you do not follow all of the steps in the order specified the Server will not automatically change the time when the new DST rules go into affect!

- 1. Install/Activate the DST patch on the Server. patch installation instructions can be obtained by following the steps directly above. This patch can be applied on top of currently running patches and Service Packs. File synchronization does not work on duplicated servers if all patches and Service Packs are not activated in the exact same order on the active and standby servers!
- 2. As an **optional** safety precaution, verify the correct Linux time zone and time are still configured on the server by using the **Server Date/Time** Maintenance Web Page.
- 3. Access the Server SAT and use the set time SAT command to see if a daylight saving rule is being used. This can be determined by checking for a non-zero value in the Daylight Savings Rule field. If a daylight saving rule is being used change the rule via the change daylight-savings-rules SAT command to match the new DST rules for 2007. Translations must be saved after the appropriate changes are made. The following screen shot provides an example of the changes that should be made to match the new daylight saving rules:

🛃 Telnet sv-st10		_ 🗆 🗙
change daylight-savings-rule		Page 1 of 2 🔺

ESC-x=Cancel Esc-e=Submit Es	c-p=Prev Pg Esc-n=Next Pg Esc-h=Help	p Esc-r=Refresh

4. If the multi-location feature is being used and additional daylight saving rules are configured on the daylight-savings-rules form, these rules must also be checked and changed if necessary depending on the locations that are using them and whether DST rules have changed for those locations. Translations must be saved after any changes.

**5. NOTE:** If the server is experiencing system time problems refer to the following web page: <u>http://support.avaya.com/japple/css/japple?PAGE=OpenPage&temp.template.name=DLT2007</u>

### **SECTION 1A – PATCH INFORMATION**

## Note: Customers are required to backup their systems before applying the Patch.

•		
How to verify the installation of the patch has been successful:	NOTE: File synchronization does not work on duplicated servers if all patches and Service Packs are not activated in the exact same order on the active and standby servers!	
	To verify a DST patch is successfully installed perform the following steps from a web browser:	
	<ol> <li>Access the Server web pages by entering the Server name or IP address in the browser Address box.</li> </ol>	
	2. Login to the web pages.	
	3. Click on Launch Maintenance Web Interface.	
	4. Click on Software Version under the Server heading.	
	<ol><li>Verify that under "UPDATES:" the appropriate DST patch shows "activated".</li></ol>	
	Alternatively, run the following bash command on the Server:	
	> update_show	
	This should show the status of the DST patch as "activated".	
What you should do if the patch installation fails?	Escalate to Avaya GSD General Business Service Desk (800-242-2121).	
How to remove the patch if malfunction of your system occurs:	even if they are deactivated and/or removed, the new	
	Run the following bash command on the Server:	
	<ul> <li>vpdate_deactivate xx.x.xxx.x-12514.tar.gz</li> <li>Where xx.x.xxx.x is the appropriate DST patch file name.</li> </ul>	
	After the command has completed run the following bash command on the Server:	
	> update_show	
	This should show the status of the patch as "deactivated".	

#### **SECTION 1B – SECURITY INFORMATION**

Are there any security risks involved? Not applicable.

Avaya Security Vulnerability Classification: Not applicable.

**Mitigation:** Not applicable.

Material Coverage<br/>Entitlements:There is no charge for the material in this PCN. The patches are<br/>available on support.avaya.com.

Service Coverage Entitlements:

**Avaya Customer** Avaya is issuing this PCN as remotely installable by the customer. If the customer requests Avaya to install this PCN, it is considered a billable event as outlined in Section 4 (Software Updates and Product Correction Notices) of the Avaya Service Agreement Supplement (Full Maintenance Coverage) unless the customer has purchased an Avaya Services enhanced offer such as the Avaya Services Product Correction Support offer.

> Additionally, Avaya on-site support is not included. If on-site support is requested, Avaya will bill the customer current Per Incident charges unless the customer has purchased an Avaya Services enhanced offer such as the Avaya Services Product Correction Support offer
