

Welcome

This CD is a collection of documentation and other resources that will help you install, operate, and maintain your S8300, S8500, or S8700 Media Server configuration as well as information about the Avaya G350, G650, and G700 Media Gateways. In addition to online versions of books in the S8300, S8500, and S8700 Series Media Servers and G350, G650, and G700 Media Gateway documentation suites, the Library contains a variety of information about Avaya Communication Manager software; telephones and consoles; and other enterprise communications systems.

To begin, select one of the following:

- ☐ [Communication Manager](#)
- ☐ [S8300 Media Server](#)
- ☐ [S8500 Media Server](#)
- ☐ [S8700 Media Server](#)
- ☐ [G350 Media Gateway](#)
- ☐ [G650 Media Gateway](#)
- ☐ [G700 Media Gateway](#)
- ☐ [DEFINITY Servers CSI, SI, and R](#)
- ☐ [Additional Documents](#)
- ☐ [Alphabetic list of documents on this CD](#)

Searching Across Documents

You can quickly search across all of the documents in this collection. To do so, you must:

- Run Adobe Acrobat or Adobe Reader in stand-alone mode (not inside a web browser window)
- Have Adobe Acrobat or a version of Reader that has the search plug-in. The full version of Adobe Reader is freely available at <http://www.adobe.com/products/acrobat/readstep2.html>
- Have access to the search engine files on a CD-ROM, hard disk, or network share

To run Adobe Reader in stand-alone mode, launch it from the program item on your desktop or in your Start Menu. Also, make sure that "What would you like to search" is set to "In the index named index.pdx" in the search pane. This should happen automatically when you click on "Search all documents" in the CD menu pages.

When PDF Search pane comes up inside a browser window, you can only search the document that you are currently viewing.
