

Title: End Of Sale Notification for Avaya DEFINITY® AUDIX® Voice Messaging System

Notification Date

Effective March 31, 2003, Avaya will no longer sell the DEFINITY AUDIX Voice Messaging System.

We now offer the INTUITY™ AUDIX® LX Multimedia Messaging Server, which provides new technology and more features and functionality at a similar price point. Also, the INTUITY AUDIX LX Server can help meet the increasing market demand for a centralized voice mail environment.

Migration Strategy

For new purchases and upgrades to standalone voice mail, Avaya now offers the [INTUITY AUDIX LX Multimedia Messaging Server](#) or INTUITY AUDIX Map 5.

If an embedded solution is required for PBX and voice mail, Avaya now offers the Avaya™ S8100 Media Server with embedded INTUITY voice mail software, or the Avaya™ S8300 Media Server with the Avaya™ IA770 INTUITY AUDIX as an IP solution.

Schedule

End of Sale	March 31, 2003
Discontinue Avaya Service Contract Renewal (On 3/31/2007, contracts will be non-renewable and no contracts will be written.)	March 31, 2007
End of Support (including documentation)	March 31, 2008

Service and Warranty

All previously executed enhanced warranty, post-warranty and service contracts will be honored for the length of the original term of the agreement. In addition, for a limited time, Avaya will continue to offer new post-warranty and service contracts for these discontinued products. Avaya will also extend existing post-warranty and service contracts for limited periods. The DEFINITY AUDIX System is a separate product and will not be linked to warranty and service contracts on the DEFINITY PBX.
