

Media Application Server

Documentation Roadmap

Release: MAS 6.4

Document Revision: 02.01

NN44471-108

Media Application Server
Release: MAS 6.4
Publication: NN44471-108
Document release date: 2 July 2010

© 2010 Avaya Inc.
All Rights Reserved.

Notice

While reasonable efforts have been made to ensure that the information in this document is complete and accurate at the time of printing, Avaya assumes no liability for any errors. Avaya reserves the right to make changes and corrections to the information in this document without the obligation to notify any person or organization of such changes.

Documentation disclaimer

Avaya shall not be responsible for any modifications, additions, or deletions to the original published version of this documentation unless such modifications, additions, or deletions were performed by Avaya. End User agree to indemnify and hold harmless Avaya, Avaya's agents, servants and employees against all claims, lawsuits, demands and judgments arising out of, or in connection with, subsequent modifications, additions or deletions to this documentation, to the extent made by End User.

Link disclaimer

Avaya is not responsible for the contents or reliability of any linked Web sites referenced within this site or documentation(s) provided by Avaya. Avaya is not responsible for the accuracy of any information, statement or content provided on these sites and does not necessarily endorse the products, services, or information described or offered within them. Avaya does not guarantee that these links will work all the time and has no control over the availability of the linked pages.

Warranty

Avaya provides a limited warranty on this product. Refer to your sales agreement to establish the terms of the limited warranty. In addition, Avaya's standard warranty language, as well as information regarding support for this product, while under warranty, is available to Avaya customers and other parties through the Avaya Support Web site: <http://www.avaya.com/support>

Please note that if you acquired the product from an authorized reseller, the warranty is provided to you by said reseller and not by Avaya.

Licenses

THE SOFTWARE LICENSE TERMS AVAILABLE ON THE AVAYA WEBSITE, [HTTP://SUPPORT.AVAYA.COM/LICENSEINFO/](http://support.avaya.com/M/LICENSEINFO/) ARE APPLICABLE TO ANYONE WHO DOWNLOADS, USES AND/OR INSTALLS AVAYA SOFTWARE, PURCHASED FROM AVAYA INC., ANY AVAYA AFFILIATE, OR AN AUTHORIZED AVAYA RESELLER (AS APPLICABLE) UNDER A COMMERCIAL AGREEMENT WITH AVAYA OR AN AUTHORIZED AVAYA RESELLER. UNLESS OTHERWISE AGREED TO BY AVAYA IN WRITING, AVAYA DOES NOT EXTEND THIS LICENSE IF THE SOFTWARE WAS OBTAINED FROM ANYONE OTHER THAN AVAYA, AN AVAYA AFFILIATE OR AN AVAYA AUTHORIZED RESELLER, AND AVAYA RESERVES THE RIGHT TO TAKE LEGAL ACTION AGAINST YOU AND ANYONE ELSE USING OR SELLING THE SOFTWARE WITHOUT A LICENSE. BY INSTALLING, DOWNLOADING OR USING THE SOFTWARE, OR AUTHORIZING OTHERS TO DO SO, YOU, ON BEHALF OF YOURSELF AND THE ENTITY FOR WHOM YOU ARE INSTALLING, DOWNLOADING OR USING THE SOFTWARE (HEREINAFTER REFERRED TO INTERCHANGEABLY AS "YOU" AND "END USER"), AGREE TO THESE TERMS AND CONDITIONS AND CREATE A BINDING CONTRACT BETWEEN YOU AND AVAYA INC. OR THE APPLICABLE AVAYA AFFILIATE ("AVAYA").

Copyright

Except where expressly stated otherwise, no use should be made of the Documentation(s) and Product(s) provided by Avaya. All content in this documentation(s) and the product(s) provided by Avaya including the selection, arrangement and design of the content is owned either by Avaya or its licensors and is protected by copyright and other intellectual property laws including the sui generis rights relating to the protection of databases. You may not modify, copy, reproduce, republish, upload, post, transmit or distribute in any way any content, in whole or in part, including any code and software. Unauthorized reproduction, transmission, dissemination, storage, and or use without the express written consent of Avaya can be a criminal, as well as a civil offense under the applicable law.

Third Party Components

Certain software programs or portions thereof included in the Product may contain software distributed under third party agreements ("Third Party Components"), which may contain terms that expand or limit rights to use certain portions of the Product ("Third Party Terms"). Information regarding distributed Linux OS source code (for those Products that have distributed the Linux OS source code), and identifying the copyright holders of the Third Party Components and the Third Party Terms that apply to them is available on the Avaya Support Web site:

<http://support.avaya.com/Copyright>

Trademarks

The trademarks, logos and service marks ("Marks") displayed in this site, the documentation(s) and product(s) provided by Avaya are the registered or unregistered Marks of Avaya, its affiliates, or other third parties. Users are not permitted to use such Marks without prior written consent from Avaya or such third party which may own the Mark. Nothing contained in this site, the documentation(s) and product(s) should be construed as granting, by implication, estoppel, or otherwise, any license or right in and to the Marks without the express written permission of Avaya or the applicable third party. Avaya is a registered trademark of Avaya Inc. All non-Avaya trademarks are the property of their respective owners.

Downloading documents

For the most current versions of documentation, see the Avaya Support. Web site: <http://www.avaya.com/support>

Contact Avaya Support

Avaya provides a telephone number for you to use to report problems or to ask questions about your product. The support telephone number is 1-800-242-2121 in the United States. For additional support telephone numbers, see the Avaya Web site: <http://www.avaya.com/support>

New in this release

The following sections detail what's new in *Media Application Server Documentation Roadmap* (NN44471-108) for Media Application Server (MAS) for Release 6.4:

- ["Features" \(page 7\)](#)
- ["Other changes" \(page 7\)](#)

Features

This document is new for Media Application Server (MAS) for Release 6.4.

Other changes

There are no other changes for this release.

Introduction

This document provides an overview of all technical documentation available for the Media Application Server (MAS) platform for Release 6.4. Additionally, this document identifies where to download the latest documentation and provides information about accessing customer service.

Navigation

- ["Roadmap" \(page 11\)](#)
- ["Information quality" \(page 19\)](#)
- ["Text conventions" \(page 21\)](#)
- ["Modular, task-based information" \(page 23\)](#)
- ["Customer service" \(page 25\)](#)

Roadmap

This chapter lists and describes the documentation available for the Media Application Server (MAS) for Release 6.4.

Navigation

- ["Documentation packaging" \(page 11\)](#)
- ["Product fundamentals" \(page 13\)](#)
- ["Planning and engineering" \(page 14\)](#)
- ["Installation and commissioning" \(page 14\)](#)
- ["Upgrades and patches" \(page 15\)](#)
- ["Operations" \(page 15\)](#)
- ["Administration and security" \(page 15\)](#)
- ["Fault and performance management" \(page 16\)](#)
- ["Installation, security, and commissioning work flow" \(page 16\)](#)

Documentation packaging

Avaya technical documents are organized according to a set of job functions. For information about how the Media Application Server documentation suite is organized, see the following figures.

Figure 1
Documentation roadmap (Part 1)

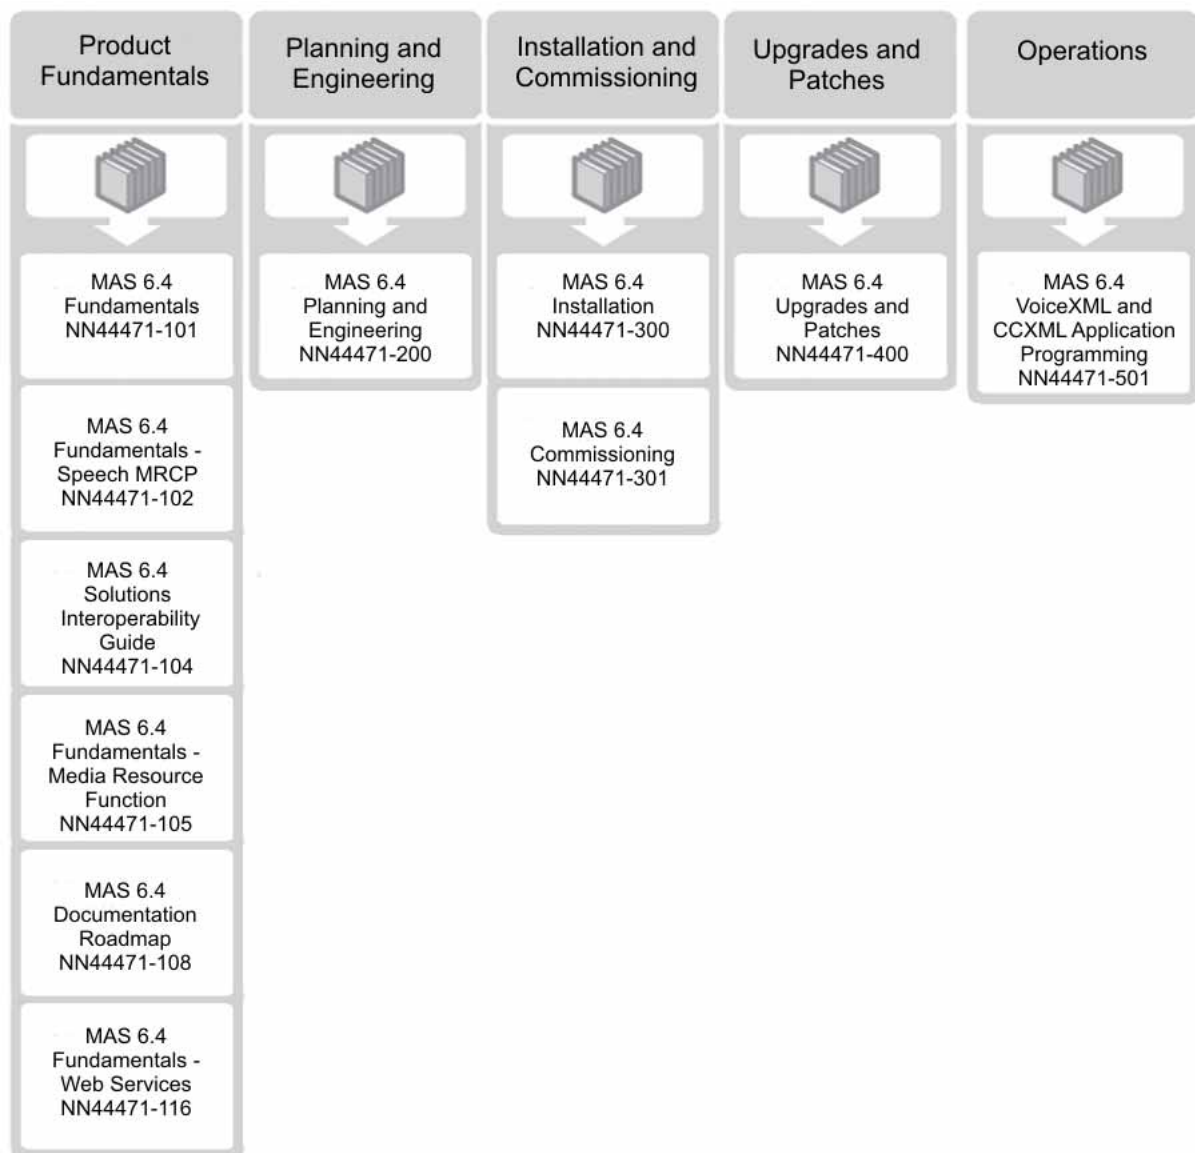

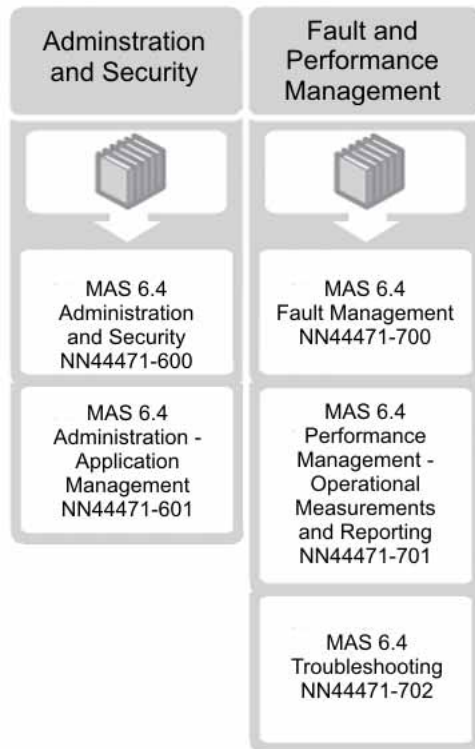

Figure 2
Documentation roadmap (Part 2)

Product fundamentals

Product fundamentals documentation includes overview and reference information about the product and product documentation.

Table 1
Product fundamentals documents

| Document title | Description |
|--|--|
| <i>Media Application Server Fundamentals</i> (NN44471-101) | This document describes the fundamentals of MAS. |
| <i>Media Application Server Fundamentals – Speech MRCP</i> (NN44471-102) | This document provides fundamental information about speech synthesis and speech recognition services for MAS. |
| <i>Media Application Server Solutions Interoperability Guide</i> (NN44471-104) | This document describes how to configure the MAS platform. |
| <i>Media Application Server Fundamentals – Media Resource Function</i> (NN44471-105) | This document describes Media Resource Function platform facilities in and IP Multimedia Subsystem core network. |

Table 1
Product fundamentals documents (cont'd.)

| Document title | Description |
|---|---|
| <i>Media Application Server Documentation Roadmap</i> (NN44471-108) | This document lists all documentation related to MAS, identifies where to download the latest documentation, and provides information about accessing customer service. |
| <i>Media Application Server Fundamentals – Web Services</i> (NN44471-116) | This document provides information about the following Web Services: <ul style="list-style-type: none">• Applications• Content Store |

Planning and engineering

Planning and engineering documentation provides information about site planning requirements, network management, performance and capacity requirements, limitations, and other information that a customer requires for installing the product.

Table 2
Planning and engineering document

| Document title | Description |
|--|---|
| <i>Media Application Server Planning and Engineering</i> (NN44471-200) | This document explains planning and engineering strategies and methodologies, as well as system, hardware, and network requirements and configurations. |

Installation and commissioning

Installation and commissioning documentation enables you to install MAS software, and perform the initial configuration.

Table 3
Installation and commissioning documents

| Document title | Description |
|---|--|
| <i>Media Application Server Installation</i> (NN44471-300) | This document describes the hardware and software installation procedures for MAS. |
| <i>Media Application Server Commissioning</i> (NN44471-301) | This document describes how to commission MAS. |

Upgrades and patches

Upgrades and patches documentation enables you to perform maintenance release upgrades and to perform Quick Fix Engineering (QFE) patches.

Table 4
Upgrades and patches document

| Document title | Description |
|--|--|
| <i>Media Application Server Upgrades and Patches (NN44471-400)</i> | This document describes how to perform maintenance release upgrades and downgrades, and how to install and remove Quick Fix Engineering (QFE) patches. |

Operations

Operations documentation supports tasks related to configuration (post-commissioning) of services or applications.

Table 5
Operations documents

| Document title | Description |
|--|--|
| <i>Media Application Server Configuration – VoiceXML and CCXML Application Programming (NN44471-501)</i> | This document describes the development environments, coding elements, and other programming requirements for developing applications in Call Control eXtensible Markup Language (CCXML) and VoiceXML. |

Administration and security

Administration and security documentation enables you to securely manage and maintain the system configuration, data, and users.

Table 6
Administration and security documents

| Document title | Description |
|---|--|
| <i>Media Application Server Administration and Security (NN44471-600)</i> | This document provides administration and security procedures for MAS. |
| <i>Media Application Server Administration - Application Management (NN44471-601)</i> | This document describes the configuration and maintenance of MAS applications on the MAS platform. |

Fault and performance management

Fault and performance management documentation enables you to manage faults and optimize the performance of the MAS platform.

Table 7

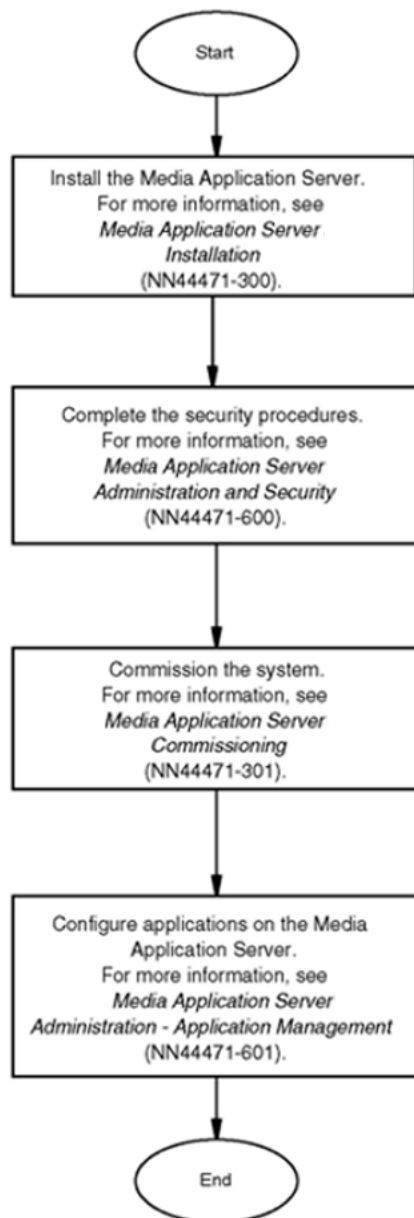

Planning and engineering documents

| Document title | Description |
|---|--|
| <i>Media Application Server Fault Management</i> (NN44471-700) | This document provides information about alarms and event logs. |
| <i>Media Application Server Performance Management – Operational Measurements and Reporting</i> (NN44471-701) | This document describes operational measurements (OMs) and report configuration. |
| <i>Media Application Server Troubleshooting</i> (NN44471-702) | This document provides information about troubleshooting issues for MAS. |

Installation, security, and commissioning work flow

The following work flow shows the tasks you must complete to install, secure, and commission MAS, and in which document you can find procedures for each task.

Figure 3
Installation, security, and commissioning work flow

Information quality

This chapter describes development stages for Avaya documentation and defines quality levels for Draft and Standard documents.

Documents are delivered with either a Draft or Standard designation for the entire book, but the content for a specific feature can be at a different stage of development.

The status definitions are as follows:

- Draft—Information is written and reviewed for technical content, but the feature is still under development and change is expected.
- Standard—The feature content was included in external trials and is suitable for delivery to customers.

Text conventions

This chapter describes the text conventions used throughout the Media Application Server (MAS) documentation suite.

Table 8
Text conventions

| Font | Convention |
|-----------------------------|---|
| Courier bold | Indicates a command to enter at the command prompt. |
| Courier | Indicates Java code or system outputs. |
| Bold font | Indicates a window, a selection, or an action. |
| <i>Italic font</i> | Indicates a document title. |
| Blue font | Indicates a cross reference. |
| <u>Blue underlined font</u> | Indicates a Web site link. |
| (>) | Indicates menu paths. |

Modular, task-based information

This chapter describes the structure of information in Avaya documentation.

Task-based documentation organizes information in a structured, modular, task-centric format. Task-based documentation focuses on what you must do and the sequence in which you must perform a set of tasks or procedures.

The goal is to make Avaya documentation easy-to-find, easy-to-use, timely, and accurate. To understand the structure and terminology associated with task-based documentation, see the following sections.

Navigation

- ["Work flows and task flows" \(page 23\)](#)
- ["Structure of work flows, task flows, and procedures" \(page 23\)](#)

Work flows and task flows

Task-based documentation emphasizes procedural information. Flow charts provide the primary navigation to tasks and procedures whenever there is a required order and flow to the actions you must perform to complete a given job.

Flow charts (called work flows and task flows) illustrate which tasks or procedures and decisions are involved in an activity. The flow charts guide you through any type of activity, whether it is initial installation, configuration, upgrades, routine maintenance, or troubleshooting.

Each flow chart provides the prerequisites and links to the tasks or procedures that you need to perform. Always follow the work flows and task flows so that you perform the required procedures in the correct order.

Structure of work flows, task flows, and procedures

For consistency, work flows, task flows, and procedures contain similar elements. Each element has a specific function.

Purpose statements

Purpose statements explain why or when you can perform a task or procedure, and its impact.

Prerequisites

Prerequisites list everything that you must do or know prior to starting a task (or set of tasks), or procedure; for example, risks, confirmation of system status, time estimates or limitations, and links to supporting information.

Work flows and task flows

A work flow is a high-level grouping of tasks. Each task is presented as a single action (or box) in a work flow chart. A task flow is a logical grouping of procedures. Each procedure is represented as a single action (or box) in a task flow chart. A work flow or task flow section in a document contains a flow chart that shows the order of tasks or procedures and major decision points. Navigational links show you where to find each task or procedure in the document.

Procedure steps

A procedure contains a set of numbered steps where each step is a single action.

Variable definitions

Variable definitions tables in procedures provide possible values, ranges, or definitions of each parameter used in the procedure steps.

Job aids

Job aids provide information that assists you in performing a procedure. A job aid can contain information that you must know in order to successfully complete the procedure.

Examples

Procedures can also contain examples that include sample values.

Customer service

Visit the Avaya Web site to access the complete range of services and support that Avaya provides. Go to www.avaya.com, or go to one of the pages listed in the following sections.

Navigation

- "Updated versions of documentation" (page 25)
- "Getting help" (page 25)
- "Express Routing Codes" (page 25)
- "Additional information" (page 26)

Updated versions of documentation

You can download and print the latest versions of Media Application Server (MAS) technical documents directly from the Internet at support.avaya.com.

Getting help

If you purchased a service contract for your Avaya product from a distributor or authorized reseller, contact the technical support staff for that distributor or reseller for assistance.

If you purchased a Avaya service program, you can get help by contacting one of the Avaya Technical Solutions Centers found at our Technical Support site at support.avaya.com.

Express Routing Codes

An Express Routing Code (ERC) is available for many Avaya products.

When you use an ERC, your call is routed to a technical support person who specializes in supporting that particular product or service. To locate an ERC for any product or service, go to support.avaya.com.

Additional information

Use the information in the following table to access other areas of the Avaya Web site.
