

Product Correction Notice (PCN)

Issue Date: 4-Nov-2013
Supplement Date: 31-Aug-2015
Archive Date: 31-Aug-2016
PCN Number: 1946S

SECTION 1 - CUSTOMER NOTICE

Products affected by this PCN:

31-Aug-2015 Supplement 4

This supplement to PCN1946S announces a Software Service Pack 4 upgrade for SIP Software Release 4.4, used with the SIP-capable Avaya 1100 Series and 1200 Series IP Deskphones. This 1100 and 1200 Series SIP Software Release 4.4 Service Pack 4 (SIP 4.4.4) provides quality improvements based on internally found and customer reported issues.

16-Mar-2015 Supplement 3

This supplement to PCN1946S announced a Software Service Pack 3 upgrade for SIP Software Release 4.4, used with the SIP-capable Avaya 1100 Series and 1200 Series IP Deskphones. This 1100 and 1200 Series SIP Software Release 4.4 Service Pack 3 (SIP 4.4.3) provides quality improvements based on internally found and customer reported issues.

29-Sept-2014 Supplement 2

This supplement to PCN1946S announced a Software Service Pack 2 upgrade for SIP Software Release 4.4, used with the SIP-capable Avaya 1100 Series and 1200 Series IP Deskphones. This 1100 and 1200 Series SIP Software Release 4.4 Service Pack 2 (SIP 4.4.2) provides quality improvements based on internally found and customer reported issues.

29-Apr-2014 Supplement 1

Supplement 1 to PCN1946S announced a Software Service Pack 1 upgrade for SIP Software Release 4.4, used with the SIP-capable Avaya 1100 Series and 1200 Series IP Deskphones. The 1100 and 1200 Series SIP Software Release 4.4 Service Pack 1 (SIP 4.4.1) provided quality improvements based on internally found and customer reported issues.

Like the original SIP 4.4 software released in November 2013 which provided interoperability and support of the 1100 and 1200 Series SIP-capable IP Deskphones with Avaya Aura® Release 6.2 FP2 or higher, this latest Service Pack (SIP 4.4.4) is on Controlled Introduction for customers who are considering migrating existing 1100 and 1200 Series IP Deskphones to Aura. This Controlled Introduction status is required only to ensure customers who are considering moving to Aura have access to the available information and resources to ensure a successful migration. SIP 4.4.4 is generally available for customers who have already migrated to Aura.

SIP 4.4.4 is Generally Available without restriction for customers using 1100 and 1200 Series IP Deskphones with SIP Software as a Maintenance Release on other supported platforms, including the CS1000 and CS2100. See the compatibility list below for an Interoperability Matrix for Avaya Call Server Platforms. IP Office customers should review IP Office release material for the supported 1100 Series and 1200 Series SIP Software Release on that platform.

The 1100 and 1200 Series IP Deskphones that support this SIP software are the 1120E, 1140E, 1165E*, 1220, and 1230 IP Deskphones. The Expansion Modules for the 1100 Series and 1200 Series

are also supported for SIP platforms. (*The 1165E is not supported on IP Office or B5800.)

The 1100 and 1200 Series IP Deskphones SIP SW Release 4.4 and SIP SW 4.4 Service Pack 1, 2, 3, and 4 are compatible with the Avaya Call Servers listed below.

- Avaya Aura® 6.2 Feature Pack 2 (1220, 1230, 1120E, 1140E, 1165E)
 - Avaya Aura® Communication Manager 6.3
 - Avaya Aura® Session Manager 6.3 / 6.3.2
 - Avaya Aura® System Manager 6.3.2
 - Avaya G430/G450 Media Gateway 6.3
 - Avaya Aura® Conferencing 7.2
 - Avaya Aura® Presence Services 6.2
 - Avaya Aura® Messaging 6.2
 - Avaya Session Border Controller for Enterprise 6.2
- Avaya Communications Server 1000 (CS1000) R7.6 (1220, 1230, 1120E, 1140E, 1165E)
- Avaya Communications Server 2100 (CS2100) Release SE13, SE16, SE17 (1220, 1230, 1120E, 1140E, 1165E IP Deskphones)

Description:

This PCN Supplement to PCN 1946S includes information on SIP Service Pack Software Release 4.4.4 for the 1100 and 1200 Series IP Deskphones, which provides a number of quality improvements based on internally found and customer reported issues.

Note that 1100 and 1200 Series SIP Software Release 4.4 and the SIP Software Release 4.4 Service Packs are on Controlled Introduction for customers considering migrating their existing 1100 / 1200 Series SIP-capable IP Deskphones to Avaya Aura®. This Controlled Introduction status is required only to ensure those customers have access to the available information and resources to ensure a successful migration. Please use the feature comparison, migration requirements & guidelines, and product documentation information that can be accessed from the SIP 4.4 Software download page on the Avaya Support Download page to ensure a successful migration. SIP 4.4.4 is generally available for customers who have already migrated to Aura.

In addition, SIP 4.4 .4 is a SIP software Maintenance Release and is generally available for other supported Avaya Call Server platforms including CS1000 and CS2100, and includes a number of quality improvements based on internally found and externally reported issues. This release is being provided as a no charge software update to all customers.

See the Readme Document for 1100 and 1200 Series IP Deskphones SIP SW R4.4.4 for a summary and description of feature enhancements, quality improvements, and Product Advisements relevant to this Software Service Pack Release. Use the link below to access the Avaya Support portal to download the software files and Readme Document associated with this 1100 / 1200 Series IP Deskphones SIP SW R4.4 Service Pack 4.

<http://support.avaya.com>

Select “Downloads & Documents”, and then enter the product name "1100 Series IP Deskphones", or '1200 Series IP Deskphones', or select from the product list shown. In the pull down menu for 'Release', select 'SIP 4.x' to access the software files and Read Me document for SIP Software Release 4.4 Service Pack 4.

Level of Risk/Severity Class 1=High Class 2=Medium Class 3=Low	Class 3 – for use as a Maintenance Release with CS1000 and CS2100, or for use by customers migrating to Avaya Aura from CS1000 or other Avaya (formerly Nortel Call Server platforms). Note that 1100 and 1200 Series IP Deskphones SIP SW R4.4 including SIP SW 4.4.1, SIP SW 4.4.2, SIP SW 4.4.3, and SIP SW 4.4.4 software upgrades are on Controlled Release for customers planning to migrate and re-use their existing IP Deskphones with Avaya Aura. SIP 4.4.4 is generally available for customers who have already migrated to Aura.
Is it required that this PCN be applied to my system?	<p>For Customers using 1100 and 1200 Series IP Deskphones with SIP software on supported call servers other than Avaya Aura, Avaya recommends that customers upgrade both new and installed 1100 and 1200 Series IP Deskphones to this SIP 4.4 Service Pack 4 as a software maintenance release at their earliest convenience.</p> <p>Customers interested in migrating existing 1100 / 1200 Series SIP-capable IP Deskphones to Avaya Aura from CS1000 or other Avaya (formerly Nortel) Call Server platforms, should be aware that this 1100 and 1200 Series SIP SW R4.4 Service Pack 4 is released under a Controlled Introduction, to ensure that customers are fully prepared for the one-time migration activity and are aware of any changes in feature support that may result from migrating and re-using the IP Deskphones on Avaya Aura.</p>
The risk if this PCN is not installed:	<p>Customers already using 1100 and 1200 Series IP Deskphones with SIP software on supported call servers will not have access to the quality improvements that have been addressed with this latest Software Service Pack.</p> <p>Customers who want to migrate their existing 1100 / 1200 Series IP Deskphones to Avaya Aura from CS1000 or other Avaya (formerly Nortel) Call Server platforms must upgrade the IP Deskphones to this SIP SW R4.4.4 version to access supported features, quality improvements, and to receive support from Avaya. SIP SW R4.4 is the minimum software release for 1100 /1200 Series SIP-capable IP Deskphones to be supported with Avaya Aura. It is recommended that customers using the 1100 and 1200 Series IP Deskphones with Aura upgrade to this latest SIP 4.4.4 Service Pack as soon as possible.</p>
Is this PCN for US customers, non-US customers, or both?	Both
Does applying this PCN disrupt my service during installation?	To minimize service disruption, applying the Software Upgrade to 1100 and 1200 Series IP Deskphones should be a planned activity. Customers who want to move to Avaya Aura and re-use their existing IP Deskphones will need to undertake a one-time migration activity to upgrade Device Configuration information in the IP Deskphones and to create User Profile and desired Features in System Manager similar to a new installation.
Installation of this PCN	Customer and/or Avaya Authorized Partner.

is required by:

Release notes and workarounds are located:

Additional information is included in the Readme Document included with the Software Package that is available at <http://support.avaya.com/>

What materials are required to implement this PCN (If PCN can be customer installed):

Download the software files for the 1100 / 1200 Series IP Deskphones, including the Readme document from the Avaya support portal.
