Original publication date: 18-Oct-2019. This is Issue #01, published date: 18-Oct-2019.

Severity/risk level

High

Urgency

Immediately

Name of problem PSN020433u - Risk of Avaya Equinox® Management (AEMG) High CPU utilization on 9.1.9.0 software

Products affected

Equinox® Conferencing 9.1.9.0 (only)

Problem description

This PSN is warning of a potential High CPU utilization problem. Although unlikely to occur, it is difficult to define the exact circumstances leading to this failure.

The problem may be seen if the following conditions are met:

1. Customer is using complex email addresses. Whereas we can provide examples of addresses which will cause a problem, there is no specific way to qualify what is a “complex email address”. Examples of addresses which may trigger the issue:
 - a. aaaaaaaaaaaaaa.bbbbbbbb.cccccccc@company.com
 - b. abcde_abcde@org_name.abc.zyx.uv
2. And, you are using a Delegate Account for this user;
3. And, this user is inactive in the Active Directory.

In these cases, it may be possible to see this issue where the Avaya Equinox Management (AEMG) will reach very high CPU utilization.

NOTE: This problem will only be seen on Equinox® Conferencing 9.1.9.0.

Resolution

Although it is not likely that all of these conditions are met at any given site and this problem would be rare, it will likely be difficult to prevent this problem from ever happening unless you are not using delegate accounts. Therefore it is Avaya’s recommendation to install the following patch to ensure this issue does not occur:

PLDS Download ID EQMNG000015: Equinox® Management Server 9.1.9 Update-1 (Mandatory patch over 9.1.9 GA)

NOTE: Applying this patch requires that the platform runs Equinox Management 9.1.9 GA release (vers.9.1.9.0.26).

Workaround or alternative remediation

n/a

Remarks

Software Update Notes

The information in this section concerns the software updates, if any, recommended in the Resolution above.

Backup before applying the new software

Always – utilize VM snapshot however multiple copies of snapshots should not be stored on the VM.

Download

Obtain software from plds.avaya.com. PLDS Download Ids are referenced in the Resolution section above when available

Software install instructions

Service-interrupting?

For Upgrades from R9.1 FP5 (9.1.5.55) or R9.1 FP8 (9.1.8.118), or for fresh OVA installations, first complete the upgrade or installation and then apply this patch

Yes

Refer to the [Administrator Guide for Avaya Equinox® Management](#)– Chapter 11: Maintaining your Videoconferencing Network.

Verification

Verify version information for the Management Server. Bundle Version should be 9.1.9.0.28, Equinox Management version should be 9.1.9.0.44.

Additionally, basic sanity testing of 5-10 calls is recommended to ensure normal system operation.

Failure

Return to backup – VM snapshot.

Software uninstall instructions

No uninstall. Return to backup – VM snapshot.
