## Introduction

This document provides information on Oceana™ 3.10.0.1 software and documentation.

For updated documentation and product support notice information for the current GA release, please visit the Avaya Support site at <http://support.avaya.com>

## What's New in Oceana™ 3.10.0.1

### New Features and Serviceability Items

Avaya Aura 10.2 is now supported by Avaya Oceana 3.10.0.1. Refer to the Avaya Support website at <http://support.avaya.com> for software installation and migration guides.

The following supported in Avaya Oceana 3.10.0.1:

1. **Avaya Breeze 3.9.0.2 platform support.**
2. **VMware ESXi 8.0 support.**
3. **Centralized logging supported on CSP platform.**

## Oceana™ 3.10.0.1 Specifications

### Operating System and Virtualization Support

Avaya Oceana™ is a suite of software applications comprising of a set of Avaya Breeze™ Snap-Ins and additional installable software. All Operating Systems (OS) software required by Avaya Oceana™ must be provided either by the end customer or the system integrator. However, it is not explicitly provided as standard by Avaya.

| Avaya Oceana™               | Operating System  |
|-----------------------------|---|
| Avaya Workspaces            | <ul style="list-style-type: none"><li>• Microsoft Windows 10, Windows 11</li><li>• Apple Mac OS 10.9 to 11.2.3.</li></ul>   |
| Avaya Control Manager       | <ul style="list-style-type: none"><li>• Please Refer to the Avaya Control Manager Offer Definition Document for the full list of supported versions of Microsoft Operating Systems and MSQl software.</li></ul> |
| Omnichannel Database Server | <ul style="list-style-type: none"><li>• Windows 2019 64 Bit (Desktop Experience).</li></ul>   |

## Virtualization Support

Avaya Breeze™ is supported only on virtualized platforms. Avaya Oceana™ 3.10.0.1 Snap-ins can only be deployed on Avaya Breeze Clusters and Nodes. Customers deploying Avaya Oceana™ are responsible for providing supported virtualized s/w, licenses and host platforms according to Avaya recommendations. Please refer to the official Avaya Oceana Deployment Guide and the Avaya Breeze Platform Documentation for additional information.

The following table lists the supported versions of VMWARE with Avaya Oceana™ 3.10.0.x and Breeze 3.9.0.2:

| VMWare Version            | Avaya Oceana™ |
|---------------------------|---------------|
| VMware ESXi 8.0 support   | Yes           |
| VMware ESXi 7.0 and above | Yes           |
| Citrix/Xenapp 7.6         | Yes           |

Customers not using this processor family need to validate compatibility via VMWare website

## Installation

### Product Compatibility

Avaya Aura 10.2 is now supported by Avaya Oceana 3.10.0.1. Refer to the Avaya Support website at <http://support.avaya.com> for software and installation guides.

Note that the compatibility matrix changes as new products in the wider Avaya portfolio are released. For a complete and most up to date list of supported and tested Avaya Oceana components, you must always refer to the detailed interoperability matrix available on the Avaya support website. For the latest and most accurate compatibility information go to: - <https://support.avaya.com/CompatibilityMatrix/Index.aspx>

## Defect Resolved in Oceana 3.10.0.1

This section contains a list of customer's identified defects Fixed in this release.

### Customer's identified defects resolved

#### Avaya Oceana

| Key           | Description   |
|---------------|---|
| WAVE-43765    | Time zone discrepancy between summary and transcript screens.   |
| UNIDESK-20433 | Unexpected differences between Workspaces Widgets in 3.7 and 3.10.  |
| UNIDESK-20420 | Emails from noreply@singlex.com taking over the whole Oceana Workspace screen.  |
| UNIDESK-20407 | Workspaces Widget for manual outbound calls onRemoteParticipantAcceptedEvent not working as expected.                                       |
| UNIDESK-20400 | WebRTC Agent cannot mute a call on Workspaces interaction.  |
| WAVE-51027    | Oceana Monitor - Oceana Monitor Certificate should not display error.   |
| WAVE-50339    | CustomerController 3.10.0.0.2 patch - Gigaspaces connection BROKEN - NotifyListenerRegistrationException                                    |
| WAVE-49943    | After switching from OnPrem mailbox to O365 (MSGraph) mailbox, plain text emails are formatted by Oceana without carriage return/line feed. |
| WAVE-49896    | Customer is sending the email as plain text; however, it arrives as a string.   |
| WAVE-49418    | Customer closes the Chat browser, but the AutomationController does not properly end the interaction.                                       |
| WAVE-48831    | Email user sent user using plain text, when agent replied to this email the format is incorrect.  |
| WAVE-48059    | Issue with special characters.  |
| WAVE-43283    | Botconnector response consists of 2 messages, only the second is being delivered to the Chat Reference Client.                              |

*Copyright 2024 Avaya Inc. All rights reserved.  
Use pursuant to the terms of your signed agreement or Avaya policy*

|               |   |
|---------------|---|
| WAVE-27118    | Invalid outbound email address appears to cause processing issues.  |
| WAVE-43258    | Oceana Chat should block Browser-side scripts within Chat attached file names.  |
| WAVE-50230    | Work Assignment Manager service heap memory shortage.   |
| WAVE-48826    | Not possible to disable mailbox in OCDB administration tool.  |
| WAVE-25013    | Consult Transfer to Routing Service not working.  |
| WAVE-48828    | Special characters not allowed in outgoing attachment name.   |
| WAVE-39235    | Exclusion filter not working on Workspaces Dashboards.  |
| WAVE-43259    | Oceana Chat should block Browser-side scripts within Chat messages .  |
| UNIDESK-12404 | Customer history search returns every contact in the Database .   |
| WAVE-50376    | Auto-response adds new customer ID/Contact ID.  |
| WAVE-45897    | Unable to remove unwanted schedule for Metadata Backup.   |
| UNIDESK-20451 | Extra Line was added to email reply (in Workspaces) when adding the Email Template.                                       |
| UNIDESK-20418 | Layouts disappear.  |
| UNIDESK-20412 | WebRTC - One Way WebRTC video - No video on client side.  |
| WAVE-48702    | As a developer, I want to include exception handling in EWT API, so that I can prevent the acceptance of negative values. |
| WAVE-48703    | Issues found from the security penetration testing of the EWT API of Oceana.  |
| WAVE-48705    | Duplicate Attribute Keys in JSON Payload.   |
| WAVE-48707    | Improper Handling of Content-Type Header.   |
| WAVE-47518    | Oceana not using the Reply-To header when sending an email reply (RFC5322)  |

**Workspaces**

| Key              | Description  |
|------------------|--|
| WORKSPACES-44836 | Supervisor cannot select Finish button when agent is in not ready status with disposition code such as Lunch Break etc.        |
| WORKSPACES-83478 | i18n   AOCW   Workspaces   Endcontractrequest   untranslated (externalization)   CHT   |
| WORKSPACES-84582 | Accessibility - Import Dashboard does not work if we are using the tab to focus on this button then press enter from keyboard. |
| WORKSPACES-82323 | Call transfer display extension instead of agent name.   |
| WORKSPACES-44340 | Failing outbound WebRTC call.  |
| WORKSPACES-51695 | Oceana Workspaces: Failed to Activate after Updating to UAC 3.8.1.0 Patch 20.  |
| WORKSPACES-32493 | UAC_3.8.1.0.12 UI issues after Consult.  |
| WORKSPACES-12907 | When modifying the workspaces layout. Changes are applied to ALL layouts.  |
| WORKSPACES-2828  | WfE - Workcard does not remain when agent in ACW (intermittent).   |
| WORKSPACES-58975 | Date format (MM/DD/YY) is not available as an option for some measures.  |
| WORKSPACES-57892 | French translation for last name and first name is incorrect in customer search.   |
| WORKSPACES-57274 | WebRTC cannot go outbound.   |
| WORKSPACES-49871 | Updated Co-Browse clientSDK will have to be adopted by Workspaces and Workspaces will have to provide a patch.                 |
| WORKSPACES-47767 | Chat History URL does not show as hyperlink while using Edge Chromium Browser.   |
| WORKSPACES-46375 | One Unlabeled Button in the Workspaces Views Manager screen.   |

Use pursuant to the terms of your signed agreement or Avaya policy*

---

|                  |   |
|------------------|---|
| WORKSPACES-46374 | Unlabeled Buttons in the Workspaces Realtime Dashboard screen.                              |
| WORKSPACES-46057 | Timestamp don't match in search history for the interaction and the chat transcript.        |
| WORKSPACES-45731 | Workspaces Dashboard Manager - cannot navigate to 'Import Dashboard' button using keyboard. |
| WORKSPACES-45729 | Workspaces Realtime dashboard - Table caption element missing brief description.            |
| WORKSPACES-14715 | Cannot download files from Workspaces Welcome homepage using MS Edge Chromium 89.           |

## Workarounds and Considerations

### Workaround Item 1: Update Authorization Cert in SMGR

Error Client authentication failed. Session validation failed" when you try to login agents. Do the following:

1. On SMGR, select the UAC cluster.

2. Update the Identity Certificate on UAC cluster.

3. If the lab is setup to require token-based access, go to SMGR → Avaya Breeze → Configuration → Authorization; Edit UAC grants.

#### Edit Grants for Authorization Client : UnifiedAgentController - Cluster2\_UAC

This page allows you to administer grants for an Authorization Client

| Grants   |                  |         |        |
|--|------------------|---------|--------|
| <a href="#">Edit Values</a> <a href="#">New</a> <a href="#">Delete</a> |                  |         |        |
| 1 Item   |                  |         |        |
| Resource Name  | Resource Cluster | Feature | Values |
| UnifiedAgentController   | Cluster2_UAC     | desktop | access |

### Workaround Item 2: OCP DVD install issue

Installation of the OCP DB software from a mounted drive may fail. The root cause of this issue is currently unclear. To work around, extract the contents of the OCP DB DVD on to a physical drive and proceed with installation from there.

### Consideration Item 1: EM Installer and Oceana 3.10 Snap-in zip file

*Copyright 2024 Avaya Inc. All rights reserved.  
Use pursuant to the terms of your signed agreement or Avaya policy*

In the Oceana 3.9 release, the EM Installer was packaged in the 'BreezePlatform' folder of the Oceana snap-in zip file. For Oceana 3.10 the EM Installer has been provided as a separate download - see Software section above. If not already installed, extract and install manually prior to upgrading to Oceana 3.10. The upgrade script does not install the EM Installer automatically.

### **Consideration Item 2: Refer to Breeze Documentation**

Please refer to the Breeze Documentation prior to performing any Oceana 3.10.0.1

### **Consideration Item 3: Edit Grants – grants will need to be re-assigned when a resource server and/or client with a newer version getting installed during the Breeze upgrades**

When logging agents in for the first time after the upgrade, the following message may appear:

Authorization Failed:

You are not authorized to access this application. This may be due to an invalid Authorization Token or an Oceana Role may not be configured for you.

1. Re-administer the grants for Authorization Service

### **Consideration Item 4: Context Store Schema Changes and Database SQL Migration**

As part of Oceana 3.8 the EDM database must be migrated to MS-SQL Server. The Customer Journey data and CS resurrection data (longer term storage of context data) are stored in a new schema. To successfully deploy the new Journey PU, a new schema must be created, and the old data migrated to the new schema.

Refer to 'Avaya Context Store Snap In Reference' for migration instructions.

*Copyright 2024 Avaya Inc. All rights reserved.*

*Use pursuant to the terms of your signed agreement or Avaya policy*

### Consideration Item 5: Coresident ACM and EDM databases

The option is available to install the MS SQL server version of the Context Store EDM database with the ACM SQL Server Database in a coresident environment.

Refer to 'Avaya Context Store Snap In Reference' for migration instructions.

### Consideration Item 6: ED Flow duration

Customers should set the Engagement Designer SVAR attribute "Number of days the user want to retain active instances" to greater than the maximum duration they expect contacts to be present in the Contact Center before being closed (e.g., if 6 days is the maximum envisaged open contact duration then set this value to 7).

### Consideration Item 7: Engagement Designer attributes that control ED database clean-up

The Engagement Designer attributes that control the ED database clean-up processes have the **wrong default values**.

This can lead to performance issues on Cluster 1 in high-volume production solutions.

Configure the Engagement Designer attributes to automatically clean the ED database and avoid performance issues.

1. Set the Oceana clusters to **Deny New Service**.
2. On the System Manager web console, click **Elements > Avaya Breeze® > Configuration > Attributes**.
3. On the **Service Clusters** tab, do the following:
4. In the **Cluster** field, select **Cluster 1**, the cluster hosting the Engagement Designer service.
5. In the **Service** field, select **EngagementDesigner**.
6. Configure these attributes.
  - a. Set attribute **Completed instance to be deleted or not** to **true**.
  - b. Set attribute **Number of days the user wants to retain error instances** to **7** (i.e., One Week)
7. Click **Commit**
8. No Cluster restart needed.

### Consideration Item 8: If BotConnector logs show PU Status NA, BROKEN or COMPROMISED, eg. "PU Status = COMPROMISED"

If BotConnector service is not able to create sessions, then check the BotConnector logs (/var/log/Avaya/services/BotConnector/BotConnector.log) to verify the PU Status.

Reboot the cluster if the PU Status is any of:

- NA
- BROKEN
- COMPROMISED

*Copyright 2024 Avaya Inc. All rights reserved.  
Use pursuant to the terms of your signed agreement or Avaya policy*

**Consideration Item 9: If Omnichannel Database backup fails for network drive**

Oceana Data Management Tool can show validation error for legit network drive path when making a backup of Omnichannel Database. In case of issue, please refer to Maintaining and Troubleshooting Avaya Oceana® document for 3.10.0.1 release for resolution steps.

**Consideration Item 10: Inbound Mail Server disappears**

After the upgrade to Oceana 3.10.0.1 and re-configuring the OC HA, it was noticed that some Inbound Mailboxes disappeared.

Follow below KB article to resolve this:

## Languages Supported

Oceana™ 3.10.0.1 supports the following languages:

| G14+2 Countries      | Language             |
|----------------------|----------------------|
| APAC                 |                      |
| China                | Simplified Chinese   |
| China                | Traditional Chinese  |
| Japan                | Japanese             |
| Korea                | Korean               |
| India                | English              |
| Australia            | English              |
| EMEA                 |                      |
| France               | French               |
| German               | German               |
| Italy                | Italian              |
| Russia               | Russian              |
| UK                   | English              |
| Middle East Counties | Arabic               |
| CALA                 |                      |
| Mexico               | Lat-Spanish          |
| Brazil               | Brazilian-Portuguese |
| US/Canada            |                      |
| Canada               | French/English       |
| US                   | English              |

## Support and Contacting Support

### Contact Support Checklist

If you are having trouble with Oceana™ 3.10.0.1 do the following:

1. Follow the instructions in written or online documentation
2. Check the documentation that came with your software for maintenance or hardware-related problems
3. Note the sequence of events that led to the problem and the exact messages

displayed. If you continue to have a problem, contact Avaya Technical Support:

1. Log in to the Avaya Technical Support Web site <http://support.avaya.com>
2. Contact Avaya Technical Support at one of the telephone numbers in the Support Directory listings on the Avaya support Web site

Avaya Global Services Escalation Management provides the means to escalate urgent service issues. For more information, see the Escalation Contacts listings on the Avaya Web site.

### Contact Support Tasks

You may be asked to email one or more files to Technical Support for analysis of your application and its environment.
