

Avaya IP Office™ Platform Release 12.2 Service Pack 1 (SP1) Release Notes / Technical Bulletin General Availability

Issue 001

1. Document Updates

Date	Description
Dec 22 nd 2025	Document issued

2. Introduction

Avaya is pleased to announce the General Availability of Avaya IP Office Release 12.2 Service Pack 1 (aka 12.2 SP1). For a full detailed product description for Avaya IP Office 12.2 SP1 see the following URL.

<https://sales.avaya.com/en/pss/ip-office>

3. Important Information – Avaya IP Office Server Edition Upgrade

- IP Office for Linux (Server Edition, Virtualize Server Edition, Select, Application Server)

Avaya IP Office R12.2 SP1 Server Edition is based on the Rocky Linux 9.x operating system. To upgrade from an earlier release the system must first be upgraded to Avaya IP Office 11.1.3 FP2 or later and the maintainer must follow the IP Office 12.0 Upgrading Linux-Based IP Office Servers to IP Office R12.0, before finally upgrading to IP Office 12.2 SP1.

[Avaya IP Office Server Edition 12.0 Upgrade Procedure](#)

4. What's New in IP Office R12.2 SP1

4.1 Summary of New Features Delivered in IP Office Release 12.2 SP1

IP Office Release 12.2 SP1 includes new features that will support market expansion, ease of doing business, openness and user client experience for the mid-market space. These are summarized below.

- **IP Office Media Manager Recordings Bulk Download using script**
- **Avaya Spaces Messaging Server removal for Avaya Cloud**
- **Support for latest Firmware for phones**
- **Rocky Linux upgrade from 9.5 to 9.6**

Note 1: Features listed are available worldwide unless otherwise specified. Not all of the features in IP Office Release 12.2 SP1 are supported on all Editions, platforms and phones - please see each feature's description for details.

4.2 IP Office Media Manager Recordings Bulk Download using script

Automates bulk downloading of Media Manager audio recordings using a VBScript on Windows. Provides a fast, hands-free way to export large sets of recordings efficiently.

4.3 Avaya Spaces Messaging Server removal for Avaya Cloud

All Spaces based messaging will not be available, hence the Avaya Spaces messaging option will not be available on the Messaging Server selection. The configuration System->Messaging Server on the IP Office Manager/Web Manager.

Copyright 2025 Avaya Inc. All rights reserved.

Use pursuant to the terms of your signed agreement or Avaya policy.

4.4 Support for latest Firmware for Phones

- Support for Firmware R22.04 to 9408 phones.
- Support for Firmware 4.1.10 to J1xx series phones.
- Support for Firmware 3.2.1.0 to K1xx series phones.
- Support for Workplace Clients
 - WP Windows: 3.40.1.10
 - WP iOS: 3.40.1.10
 - WP Android: 3.40.1.20
 - WP MAC: 3.40.0.117.28

4.5 Rocky Linux upgrade from 9.5 to 9.6

Upgraded Rocky Linux from version 9.5 to latest 9.6 to ensure all operating systems and third-party software are up to date with the latest security patches.

5. Upgrading to IP Office R12.2 SP1

Avaya IP Office R12.2 SP1 software/binaries will be available through PLDS or the support site. Customers will need to upgrade to the R12.2 SP1 software load using Manager and can use their existing R12 licenses for this upgrade.

Note that with General Availability of IP Office R12.0 Service Packs are no longer being provided for R11.1 except for one final IP Office 11.1.3 Service Pack 2 that was GA in July 2024. Avaya reserves the right to change this schedule. Refer to the Avaya Product Lifecycle Policy for further information.

IP Office Support Services (IPOSS) customers entitled to IP Office software updates/upgrades under a current support agreement will be upgraded in accordance with the terms of their support contract.

The terms and conditions of the IP Office Support Services offer and how to purchase support coverage can be found on the link below.

<https://sales.avaya.com/en/pss/ip-office-support-services?view=collateral>

IPOSS policy will continue as N-1 as it includes maintenance and configuration support if needed and provide upgrade entitlement to R12.0. There are no additional Service Packs planned for R11.1 following the GA of the IP Office 11.1.3. Service Pack 2 July 2024 all future fixes will only be delivered in R12 Service Packs

6. Security

For detailed information on implementing and maintaining IP Office Platform security, please refer to [Avaya IP Office Platform Security Guidelines](#)

7. Build Versions

7.1 IP Office 12.2 SP1 GA Software Versions

Component	Version
Admin CD	12.2.0.1.0 Build 32

SoftConsole	✓	✓
one-X Portal Plug-In for Outlook	✓	✓

Windows Desktop Virtualization Support

This section covers those applications specifically supported on virtualized desktops (Citrix VDI).

- **one-X Portal for IP Office** - This includes the one-X Call Assistant and the Outlook Plug-In (requires Citrix local profile mode).
- **Avaya Workplace for Windows** - Support in IP Office environments added in FP2.

Avaya Workplace Client Supported Platforms

Based on support for Avaya Workplace 3.40 and the claimed OS support in the Avaya compatibility for that release.

VMware ⁽¹⁾ :		
• ESXi 7.0	✓	VMware announced end of support date: 2nd April 2025.
• ESXi 8.0	✓	Support added from R11.1.3.

- VMware support is on Standard, Enterprise, Enterprise Plus, Essentials and Essentials Plus platforms.

9. Supported Hardware

Platform and features supported on the platform will be modified with the IP Office R12.2 SP1 release. Supported platforms are:

- IP500 V2 Control unit
- IP Office for Linux (Server Edition, Virtualize Server Edition, Select, Subscription)

10. Known Issues

10.1 NTP service becomes inactive after IP Office for Linux upgraded to new build.

To work around the issue please follow these steps:

- login to IP Office cli with root user.
- run the command "systemctl restart chronyd" to start the NTP service.

10.2 ASP 110 servers (Dell R640/R660) upgrade using a USB from IP Office R12.2 to current release does not update the Rocky Linux OS version from 9.5 to 9.6.

- It is recommended web manager is used to perform the upgrade using IP Office file transfer.
- Please refer to chapter 19 "Upgrading systems using an ISO file transfer" of document "Deploying IP Office Server Edition and Application Servers" for details.
<https://support.avaya.com/css/public/documents/101093692>

10.3 Intermittently ASP110 (Dell 640/660) servers show the partitions for boot(sda) and additional storage (sdb) are interchanged.

- This can be checked with command "lsblk" on IP Office cli (login with root user).
- When devices are incorrectly assigned, /boot and /boot/efi will be in sdb device.
- To work around the issue, we need to reboot IP Office, and this will swap the devices back to correct names partition order.

10.4 Certificate Warnings displayed during Deployment of Server Edition 12.2 SP1 OVF: During deployment of the Server Edition 12.2 SP1 OVF (Build 32), VMware will display certificate warnings during the Review Details step, including:

- The certificate is expired.
 - The certificate is not trusted.
- Note: These certificate warnings are known and expected for this build and do not impact system functionality after deployment
- Updated Certificate will be available in the next release.

11 Resolved Field Issues

This IP Office R12.2 SP1 release also addresses several customer issues found in the previous IP Office 11.1 GA and R12 releases, these are listed below.

JIRA Number	Description of Issue
IPOFFICE-176090	Dialling Dial Paging short code on a DECT and then pressing Answer/Dial Key on the terminal result in no speech path for 373X

Copyright 2025 Avaya Inc. All rights reserved.

Use pursuant to the terms of your signed agreement or Avaya policy.

	phones.
IPOFFICE-169388	No speech on page call from DECT 3730 or 3735 handset.
IPOFFICE-187802	Request to allow adding the 127.0.0.1 IP address to the VoIP Access Control List (IP Whitelist) in IP Office 12.2.0.0.0 build 50.
IPOFFICE-186253	IX Workplace Remote Client on Windows: Shared Control feature does not work when J1XX Desk Phone is on the same remote home router.

12 Technical Notes

- DevConnect verification for IP Office: Tested the DevConnect APIs.
- Localization Enablement: Improved IP Office Web Manager Online Help to dynamically route users to the correct help page according to the selected locale.
- File Management Enhancements: Added File Manager Upload capability for IP Office 500 V2 Standalone Mode within Avaya IP Office Web Manager.
- EOL Component Modernization: Upgraded User Portal Application to Angular 20, addressing end-of-life dependencies and improving maintainability.

12.1 SD Card Storage

IP 500v2 systems SD card memory filled with old J1xx firmware files that are not removed from IP Office 500v2 systems when NEW firmware files added to the system after upgrading the system to new software release. Recommend removing the older J1xx versions of firmware files from the IP500 v2 system by following steps (retain the latest 4.1.10.0.7 J1xx firmware):

- Login to Web Manager
- Navigate to Applications -> File Manager
- Navigate to folder Disk->system->primary
- From right side files pane, select the old J1xx firmware files
- Remove the selected J1xx firmware files with Delete operation provided.

Note: Perform the above step only if SD card storage is close to full.

12.2 UCM support on R12.2 SP1

The original release of IP Office R12.0 did not include support for the Unified Communications Module (UCM) in IP Office IP500 V2 systems. However, following extensive testing as part of IP Office R12.2 SP1, Avaya will now support R12.0/R12.2 IP Office systems that include R11.1.3.2. UCM modules but with the following caveats:

- There will be no future updates to the IP Office software components provided on the UCM modules.
- There will not be any future updates for the CentOS Operating System and the security CVEs patches for the UCM modules.

13 Languages Added

IP Office release 12.2 SP1 adds no new languages.

Use pursuant to the terms of your signed agreement or Avaya policy.

14 Documentation

The latest versions of detailed release information can be found in the below locations:

- DVD media available with Avaya IP Office R12.2 SP1 software pack
- Documentation library - Contains all administrator and user documentation for IP Office - <https://support.avaya.com/css/public/documents/101093951>
- The Avaya support site – Contains all administrator and user documentation for IP Office - <https://support.avaya.com>

The Release 12.2 SP1 Documentation is available at GA:

- Go to <https://support.avaya.com>
- Select [Avaya Support](#) under Downloads & Documents
- Enter 'IP Office' as your product
- Choose '12.2 Service Pack 1' as your release
- Click the 'Documents' radio button
- Click 'Enter' to see all documentation

The latest version of the IP Office Product Description Document, which defines the IP Office product in more detail, can be found on the Avaya Partner Portal (www.avaya.com/salesportal) and will require a valid Single Sign On (SSO) user name and password to view it online.

The latest version of the IP Office 12.2 SP1 Offer Definition, which is a communication that summarizes “what’s new” within the IP Office Release 12.2 SP1 product, can be found on the Avaya Partner Portal

15 Contacting support

Contact Support Checklist

If you are having trouble with *IP Office*, you should:

- Retry the action. Carefully follow the instructions in written or online documentation.
- Check the documentation that came with your hardware for maintenance or hardware-related problems.
- Note the sequence of events that led to the problem and the exact messages displayed. Have the Avaya documentation available.

If you continue to have a problem, contact Avaya Technical Support:

- Log in to the Avaya Technical Support Web site <https://support.avaya.com>.
- Contact Avaya Technical Support at one of the telephone numbers in the Support Directory listings on the Avaya support Web site.

Avaya Global Services Escalation Management provides the means to escalate urgent service issues. For more information, see the Escalation Contacts listings on the Avaya Web site.

*Copyright 2025 Avaya Inc. All rights reserved.
Use pursuant to the terms of your signed agreement or Avaya policy.*

16 Contact Support Tasks

You may be asked to email one or more files to Technical Support for analysis of your application and its environment.

The document "Information Required When Raising an IP Office Escalation to Avaya.pdf" helps to generate the files needed by Technical Support. The document is available in the documentation library - <https://support.avaya.com/css/public/documents/101093951>
