

Using Avaya Aura[®] Messaging Web Access

Release 6.3.1
Issue 4
July 2014

Notice

While reasonable efforts have been made to ensure that the information in this document is complete and accurate at the time of printing, Avaya assumes no liability for any errors. Avaya reserves the right to make changes and corrections to the information in this document without the obligation to notify any person or organization of such changes.

Documentation disclaimer

"Documentation" means information published by Avaya in varying mediums which may include product information, operating instructions and performance specifications that Avaya may generally make available to users of its products and Hosted Services. Documentation does not include marketing materials. Avaya shall not be responsible for any modifications, additions, or deletions to the original published version of documentation unless such modifications, additions, or deletions were performed by Avaya. End User agrees to indemnify and hold harmless Avaya, Avaya's agents, servants and employees against all claims, lawsuits, demands and judgments arising out of, or in connection with, subsequent modifications, additions or deletions to this documentation, to the extent made by End User.

Link disclaimer

Avaya is not responsible for the contents or reliability of any linked websites referenced within this site or documentation provided by Avaya. Avaya is not responsible for the accuracy of any information, statement or content provided on these sites and does not necessarily endorse the products, services, or information described or offered within them. Avaya does not guarantee that these links will work all the time and has no control over the availability of the linked pages.

Warranty

Avaya provides a limited warranty on Avaya hardware and software. Refer to your sales agreement to establish the terms of the limited warranty. In addition, Avaya's standard warranty language, as well as information regarding support for this product while under warranty is available to Avaya customers and other parties through the Avaya Support website: <http://support.avaya.com> or such successor site as designated by Avaya. Please note that if you acquired the product(s) from an authorized Avaya Channel Partner outside of the United States and Canada, the warranty is provided to you by said Avaya Channel Partner and not by Avaya.

Licenses

THE SOFTWARE LICENSE TERMS AVAILABLE ON THE AVAYA WEBSITE, [HTTP://SUPPORT.AVAYA.COM/LICENSEINFO](http://support.avaya.com/licenseinfo) OR SUCH SUCCESSOR SITE AS DESIGNATED BY AVAYA, ARE APPLICABLE TO ANYONE WHO DOWNLOADS, USES AND/OR INSTALLS AVAYA SOFTWARE, PURCHASED FROM AVAYA INC., ANY AVAYA AFFILIATE, OR AN AVAYA CHANNEL PARTNER (AS APPLICABLE) UNDER A COMMERCIAL AGREEMENT WITH AVAYA OR AN AVAYA CHANNEL PARTNER. UNLESS OTHERWISE AGREED TO BY AVAYA IN WRITING, AVAYA DOES NOT EXTEND THIS LICENSE IF THE SOFTWARE WAS OBTAINED FROM ANYONE OTHER THAN AVAYA, AN AVAYA AFFILIATE OR AN AVAYA CHANNEL PARTNER; AVAYA RESERVES THE RIGHT TO TAKE LEGAL ACTION AGAINST YOU AND ANYONE ELSE USING OR SELLING THE SOFTWARE WITHOUT A LICENSE. BY INSTALLING, DOWNLOADING OR USING THE SOFTWARE, OR AUTHORIZING OTHERS TO DO SO, YOU, ON BEHALF OF YOURSELF AND THE ENTITY FOR WHOM YOU ARE INSTALLING, DOWNLOADING OR USING THE SOFTWARE (HEREINAFTER REFERRED TO INTERCHANGEABLY AS "YOU" AND "END USER"), AGREE TO THESE TERMS AND CONDITIONS AND CREATE A BINDING CONTRACT BETWEEN YOU AND AVAYA INC. OR THE APPLICABLE AVAYA AFFILIATE ("AVAYA").

Avaya grants you a license within the scope of the license types described below, with the exception of Heritage Nortel Software, for which the scope of the license is detailed below. Where the order documentation does not expressly identify a license type, the applicable license will be a Designated System License. The

applicable number of licenses and units of capacity for which the license is granted will be one (1), unless a different number of licenses or units of capacity is specified in the documentation or other materials available to you. "Software" means Avaya's computer programs in object code, provided by Avaya or an Avaya Channel Partner, whether as stand-alone products, pre-installed, or remotely accessed on hardware products, and any upgrades, updates, bug fixes, or modified versions thereto. "Designated Processor" means a single stand-alone computing device. "Server" means a Designated Processor that hosts a software application to be accessed by multiple users. "Instance" means a single copy of the Software executing at a particular time: (i) on one physical machine; or (ii) on one deployed software virtual machine ("VM") or similar deployment.

License types

Designated System(s) License (DS). End User may install and use each copy or an Instance of the Software only on a number of Designated Processors up to the number indicated in the order. Avaya may require the Designated Processor(s) to be identified in the order by type, serial number, feature key, Instance, location or other specific designation, or to be provided by End User to Avaya through electronic means established by Avaya specifically for this purpose.

Concurrent User License (CU). End User may install and use the Software on multiple Designated Processors or one or more Servers, so long as only the licensed number of Units are accessing and using the Software at any given time. A "Unit" means the unit on which Avaya, at its sole discretion, bases the pricing of its licenses and can be, without limitation, an agent, port or user, an e-mail or voice mail account in the name of a person or corporate function (e.g., webmaster or helpdesk), or a directory entry in the administrative database utilized by the Software that permits one user to interface with the Software. Units may be linked to a specific, identified Server or an Instance of the Software.

Database License (DL). End User may install and use each copy or an Instance of the Software on one Server or on multiple Servers provided that each of the Servers on which the Software is installed communicates with no more than an Instance of the same database.

CPU License (CP). End User may install and use each copy or Instance of the Software on a number of Servers up to the number indicated in the order provided that the performance capacity of the Server(s) does not exceed the performance capacity specified for the Software. End User may not re-install or operate the Software on Server(s) with a larger performance capacity without Avaya's prior consent and payment of an upgrade fee.

Named User License (NU). You may: (i) install and use the Software on a single Designated Processor or Server per authorized Named User (defined below); or (ii) install and use the Software on a Server so long as only authorized Named Users access and use the Software. "Named User", means a user or device that has been expressly authorized by Avaya to access and use the Software. At Avaya's sole discretion, a "Named User" may be, without limitation, designated by name, corporate function (e.g., webmaster or helpdesk), an e-mail or voice mail account in the name of a person or corporate function, or a directory entry in the administrative database utilized by the Software that permits one user to interface with the Software.

Shrinkwrap License (SR). You may install and use the Software in accordance with the terms and conditions of the applicable license agreements, such as "shrinkwrap" or "clickthrough" license accompanying or applicable to the Software ("Shrinkwrap License").

Copyright

Except where expressly stated otherwise, no use should be made of materials on this site, the Documentation, Software, Hosted Service, or hardware provided by Avaya. All content on this site, the documentation, Hosted Service, and the Product provided by Avaya including the selection, arrangement and design of the content is owned either by Avaya or its licensors and is protected by copyright and other intellectual property laws including the sui generis rights relating to the protection of databases. You may not modify, copy, reproduce, republish, upload, post, transmit or distribute in any way any content, in whole or in part, including any code and software unless expressly authorized by Avaya. Unauthorized reproduction, transmission, dissemination, storage, and or use without the express

written consent of Avaya can be a criminal, as well as a civil offense under the applicable law.

Avaya), scroll to the bottom of the page, and select Contact Avaya Support.

Virtualization

Each product has its own ordering code and license types. Note that each Instance of a product must be separately licensed and ordered. For example, if the end user customer or Avaya Channel Partner would like to install two Instances of the same type of products, then two products of that type must be ordered.

Third Party Components

"Third Party Components" mean certain software programs or portions thereof included in the Software or Hosted Service may contain software (including open source software) distributed under third party agreements ("Third Party Components"), which contain terms regarding the rights to use certain portions of the Software ("Third Party Terms"). As required, information regarding distributed Linux OS source code (for those Products that have distributed Linux OS source code) and identifying the copyright holders of the Third Party Components and the Third Party Terms that apply is available in the Documentation or on Avaya's website at: <http://support.avaya.com/Copyright> or such successor site as designated by Avaya. You agree to the Third Party Terms for any such Third Party Components

Note to Service Provider

The Product or Hosted Service may use Third Party Components subject to Third Party Terms that do not allow hosting and require a Service Provider to be independently licensed for such purpose. It is your responsibility to obtain such licensing.

Preventing Toll Fraud

"Toll Fraud" is the unauthorized use of your telecommunications system by an unauthorized party (for example, a person who is not a corporate employee, agent, subcontractor, or is not working on your company's behalf). Be aware that there can be a risk of Toll Fraud associated with your system and that, if Toll Fraud occurs, it can result in substantial additional charges for your telecommunications services.

Avaya Toll Fraud intervention

If you suspect that you are being victimized by Toll Fraud and you need technical assistance or support, call Technical Service Center Toll Fraud Intervention Hotline at +1-800-643-2353 for the United States and Canada. For additional support telephone numbers, see the Avaya Support website: <http://support.avaya.com> or such successor site as designated by Avaya. Suspected security vulnerabilities with Avaya products should be reported to Avaya by sending mail to: securityalerts@avaya.com.

Trademarks

The trademarks, logos and service marks ("Marks") displayed in this site, the Documentation, Hosted Service(s), and Product(s) provided by Avaya are the registered or unregistered Marks of Avaya, its affiliates, or other third parties. Users are not permitted to use such Marks without prior written consent from Avaya or such third party which may own the Mark. Nothing contained in this site, the Documentation, Hosted Service(s) and Product(s) should be construed as granting, by implication, estoppel, or otherwise, any license or right in and to the Marks without the express written permission of Avaya or the applicable third party.

Avaya is a registered trademark of Avaya Inc.

All non-Avaya trademarks are the property of their respective owners. Linux® is the registered trademark of Linus Torvalds in the U.S. and other countries.

Downloading Documentation

For the most current versions of Documentation, see the Avaya Support website: <http://support.avaya.com>, or such successor site as designated by Avaya.

Contact Avaya Support

See the Avaya Support website: <http://support.avaya.com> for Product or Hosted Service notices and articles, or to report a problem with your Avaya Product or Hosted Service. For a list of support telephone numbers and contact addresses, go to the Avaya Support website: <http://support.avaya.com> (or such successor site as designated by

Chapter 1: Getting started

Avaya Aura[®] Messaging Web Access

Avaya Aura[®] Messaging Web Access is a secure web client to access and manage voice mail messages in your Messaging mailbox. Using Messaging Web Access, you can perform the following functions:

- Play voice messages on a telephone or personal computer.
- Record and send voice messages from a telephone or computer.

 Note:

To play, record, and send voice messages through your computer, you need a headset or a microphone and speakers.

- Forward voice messages.
- Reply to voice messages.
- Call the sender of a voice message.
- Delete voice messages.
- Record, change, and manage your greetings.
- Change the status and subject of a voice message.
- Edit your mailbox account settings.

Because Messaging Web Access is a secure web client, you cannot:

- Capture and save a copy of a voice message to a file on your computer.
- Send or forward voice messages to local or remote subscribers outside the Messaging system.
- Send or forward voice messages to email addresses.

Requirements

You must get the following:

- An account or mailbox on Messaging 6.3 FP1 or later

- A personal computer with one of the following operating systems:
 - Microsoft® Windows® 7 or later
 - Apple Mac OS X 10.7 or later
- One of the following web browsers:
 - Microsoft® Windows® Internet Explorer 9 or later
 - Mozilla Firefox 30 or later
 - Google Chrome 35 or later
 - Apple Safari 6 or later
- Adobe Flash Player 14 or later
- A headset or a microphone and speakers for playing and recording voice messages from your computer.

Logging in to Messaging Web Access

Before you begin

- Ensure that your computer meets the Messaging Web Access requirements. For more information, see [Requirements](#) on page 5.
- Get the URL for Messaging Web Access from the system administrator.
- Get the mailbox and password of your Messaging account.
- Initialize your mailbox using a phone. For more information, see *Using Avaya Aura® Messaging* on the Avaya Support website: <http://support.avaya.com>.

Note:

- To use Messaging Web Access, the system administrator must enable Messaging Web Access for your mailbox.
- If you are unable to gain access to the URL for Messaging Web Access, contact the system administrator.

Important:

- You must not log in to your Messaging account simultaneously with Messaging Web Access and the telephone user interface (TUI).
- You can log in to Messaging Web Access when the Messaging storage server is offline, but cannot send or receive messages.

Procedure

1. Using any of the supported operating systems and browsers, go to the Messaging Web Access address provided by your Messaging system administrator.

The system displays the Welcome dialog box.

2. In the **Mailbox** field, type your mailbox number.
3. In the **Password box** field, type your password.
4. If you want to log in to Messaging Web Access without entering your mailbox number and password for the next 8 hours, select **Remember me**.

 Note:

- To use the **Remember me** option, the system administrator must enable the option for your mailbox.
- The system administrator can change the number of hours after which the Messaging Web Access session expires. The default number of hours is 8 hours.

5. Click **Log in**.

The system displays the Avaya Aura® Messaging Web Access Messages page.

Welcome field description

Name	Description
Mailbox	The Messaging mailbox number is your Messaging telephone number.
Password	The Messaging password.
Remember me	The system remembers your Messaging Web Access login credentials for the next 8 hours.

Avaya Aura® Messaging Web Access Messages view

Use this page to view and manage your voice messages.

After logging into Messaging Web Access, for every voice message you receive, the system displays a notification at the bottom of the Messages page.

 Note:

Microsoft® Windows® Internet Explorer 9 does not display the new message notifications if the Messaging Web Access browser is inactive.

The top of the page displays one of the following connection status of Messaging Web Access.

- **Connected:** Indicates that Messaging Web Access can connect to the Messaging system notification server and is receiving updates from the Messaging system.
- **Disconnected:** Indicates that Messaging Web Access cannot gain access to the Messaging system notification service.

 Important:

You can not receive or send messages in Disconnected state.

*** Note:**

Messaging Web Access tries to gain access to the Messaging system notification server every 60 seconds until it connects successfully. If Messaging Web Access cannot gain access to the Messaging system notification server for an extended time, contact your system administrator.

Messages field description

Name	Description
From	The name of the sender of a voice message. Sorts the messages by sender in ascending or descending order.
Subject	The information about a voice message. For example, this field displays the name and telephone number of the sender of a message. Sorts the messages by subject in ascending or descending order.
Received	The date and time of reception of a voice message. Sorts the messages by date and time in ascending or descending order.
Duration	The duration of a voice message including all attachments. Sorts the messages by duration in ascending or descending order.

Icon description

Icon	Name	Description
	Flag	The voice message tags are, Broadcast, Private (), or Important (). Sorts the messages based on tagged or untagged.
	Delete	Deletes a voice message.

Button description

Name	Description
Messages	Displays the Messaging Web Access Messages page and a list of voice messages.
Preferences	Displays the Avaya Aura® Messaging User Preferences page to customize the settings of your Messaging account.
Compose	Records a new voice message to send to the appropriate people.
Reply	Records and sends a reply voice message to the sender of a voice message.
Reply all	Records and sends a reply voice message to all addressees of a voice message.
Forward	Forwards a voice message to other people. You can also record and send a new message with a forwarded message.
Play message	Plays a voice message. You can specify whether you want to play a message using computer or telephone.
Call sender	Calls the sender of a voice message.

Playback devices

Messaging Web Access plays a voice message on a personal computer or on a telephone. You can select your playback device while performing any of the following functions :

- Composing a new message.
- Playing a message.
- Forwarding a message.
- Replying a message.

The available playback options are:

- **Play/record through desktop:** Messaging Web Access plays all your voice messages on your desktop. **Play/record through desktop** is the recommended option to gain access to all Messaging Web Access functions and for the better user experience.
- **Play/record through telephone:** Messaging Web Access plays all your voice messages on your phone. Depending on the function you perform, the system displays the following dialog boxes with the User Preference configuration for your Messaging account:
 - **Play on Phone**
 - **Voice Reply**
 - **Voice Forward**
 - **Voice Compose**
 - **Call Sender**

The dialog boxes prompt you to specify your telephone number.

To prevent the display of the dialog boxes, select the **Always use this phone** option on the **General** tab in User Preferences.

When using the telephone as your default playback device, you must log in to your Messaging mailbox using the telephone user interface (TUI).

Changing the default playback device

About this task

You can change the default playback device from any of the following buttons on the Messages page.

- **Play message**
- **Reply**
- **Reply all**
- **Forward**
- **Compose**

Procedure

1. On the Messages page, select a voice message and then click the appropriate button.
Alternatively, you can right-click the voice message and select the function from the menu.
Based on the button you click to perform a function, the system displays a dialog box, where you can select your default device.
2. Click the **Communication type** icon at the top of the dialog box.
The system displays the following options:
 - **Play/record through telephone**
 - **Play/record through desktop**
3. Select the playback device you prefer.
The system changes the **Communication type** icon based on your selection.

Logging out of Messaging Web Access

Procedure

At the top of the Avaya Aura® Messaging Web Access window, click **Log out**.

Chapter 2: Working with messages

Managing messages

On the Messages webpage you can perform any of the following functions:

- Listen to a voice message through your personal computer or a telephone.
- Forward a voice message to other Messaging users.
- Reply to the sender or all Messaging users to whom the selected voice message is addressed.
- Delete a voice message.
- Call the sender of a voice message.

 Note:

- After selecting a message you can play, replay, forward, delete, or call the sender of that message.
- You must have a voice message from a Messaging user in your mailbox before you can play, replay, forward, delete, or call the sender of that message.

Listening to a message

Before you begin

You must have a voice message from a Messaging user in your mailbox.

Procedure

1. On the Messages page, click the voice message that you want to play, and then click **Play message**.

Alternatively, you can perform any of the following steps:

- Right-click the voice message that you want to play, and click **Play message** from the pop-up menu.
- Double-click the voice message that you want to play.

The system displays the Play message dialog box, and your default device.

2. Depending on the **Communication type**, Messaging performs one of the following tasks.
 - Plays the message on computer.
 - The system displays Play on Phone dialog box.

3. In the Play on Phone dialog box, click **Call**.

To play voice messages on a telephone, you must specify the appropriate telephone number.

Messaging calls your phone.

4. When your telephone rings, lift the receiver and log in to your mailbox.

Messaging plays the message.

 Important:

After listening to the message and hanging up the receiver, you must close the Play on Phone and Play message dialog boxes.

Preserving a message

About this task

Use this procedure to restart the retention timer and preserve a message before Messaging automatically deletes the message.

Procedure

1. In the Play message dialog box, click  **More options**.

The system displays the following options:

- **Call sender**
- **Preserve**

2. Click **Preserve**.

The system retains the message by restarting the retention timer.

Play message field description

Name	Description
Received	The date and time when you received the selected voice message.
From	The name of the person who sent the selected voice message.
To	The name of the receiver of the voice message.
Subject	The subject of this voice message. You can change the subject information for any message, except broadcast messages and delivery status notifications.

Button description

Button	Name	Description
	Message play slider	Plays the part of a message that you select using the slider. You can move the slider right or left to play an earlier or a later part of a message.
	Play	Plays a voice message.

Button	Name	Description
	Pause	Pauses the voice message that you are playing.
	Stop	Stops playing the voice message.
	Volume control slider	Increases or decreases the volume of the playing message.

Icon description

Icon	Name	Description
	Number of recordings	If a voice message has multiple recordings, the number of recordings displays at the top of the dialog box. You can click the left arrow or the right arrow to select the message that you want to play.
	Delete	Deletes a voice message.
	Reply	Records and sends a reply to the person who sent you the selected voice message.
	Reply all	Records and sends a reply to all Messaging users addressed on a voice message.
	Forward	Forwards the selected voice message to other Messaging users. You can also record and send a new message with the forwarded message.
	More options	Displays the following options: • Call sender: Calls the sender of the voice message. • Preserve: Restarts the retention timer and preserves a message before Messaging automatically deletes the message.
 or 	Communication type	Specifies the device to record and listen to the voice message. The options are: • Play/record through desktop • Play/record through telephone The system displays the icon corresponding to your selection.

Replying to a message

Replying to a message using a personal computer

Procedure

1. On the Messages page, click a voice message.
2. Select either **Reply** or **Reply all**.

Alternatively, you can right-click the voice message and select the function from the menu.

The system displays the RE: dialog box.

3. Click  **Start recording** to record a voice message. Alternatively, you can click **Re-record** to re-record your voice message.

You can perform the following tasks:

- Click **High importance** to set the priority status of a voice message.
- Click **Private** to set the privacy status of a voice message.

4. Click **Send**.

Replying to a message using a telephone

Procedure

1. On the Messages page, click a voice message.
2. Select either **Reply** or **Reply all**.

Alternatively, you can right-click the voice message and select the function from the menu.

The system displays the RE: dialog box.

3. Click **Call**.

Messaging displays the Voice Reply dialog box.

4. Click **Call**.

Messaging calls your telephone.

5. When your telephone rings, lift the receiver and log in to your mailbox. Use the appropriate TUI commands to perform the following tasks:

- Record your voice message using the telephone user interface (TUI).
- Re-record your voice message.
- Select the recipients for your voice message.
- Set the priority status of the voice message.
- Set the voice message as private.

6. Send the message using the appropriate TUI command.

Important:

After sending the message and hanging up the receiver, you must close the Voice Reply and RE: dialog boxes.

Reply field description

Name	Description
To	The name or mailbox number of the person to whom you want to send the voice message. By default, this field displays the name of the sender.

Name	Description
	You can remove a person from the To list by clicking X for that person.
Subject	The subject of the voice message. You can change the subject of a voice message.
High importance	The priority status of a voice message. You can assign High importance as the priority status of a voice message.
Private	The privacy status of a voice message. You can mark the voice message as private.
Send	Sends the recorded voice message to the specified person.

Icon description

Icon	Name	Description
 or 	Communication type	Specifies the device to record and listen to the voice message. The options are: • Play/record through desktop • Play/record through telephone The system displays the icons corresponding to your selection.
	Add recipient	Adds recipients. The system displays the Choose a Contact dialog box. You can select a contact from the Enterprise contacts or Personal distribution list.
	Start recording	Records a voice message through your personal computer. The system displays Adobe Flash Player Settings dialog box and prompts you to confirm that you are using microphone. In the Adobe Flash Player Settings dialog box, click Allow. Speak your voice message into your microphone. When you finish, click Stop or remain quiet. The recording stops after 4 seconds of silence. After the recording stops, the system plays your voice message.
	Stop recording	Stops recording your voice message.

Button description

Button	Name	Description
	Message play slider	Plays the part of a message that you select to play. You can move the slider right or left to play an earlier or a later part of a message.
	Re-record	Re-records your voice message.
	Play	Plays the voice message you recorded.
	Pause	Pauses the voice message you are playing.

Button	Name	Description
	Stop	Stops playing the voice message.

Forwarding a message

Forwarding a message using a personal computer

About this task

You cannot forward private messages.

Procedure

1. On the Messages page, select a message and then click **Forward**. Alternatively, you can right-click the message that you want to forward and click **Forward**.

The system displays the FW: dialog box.

2. Type the name or the extension of the person to whom you want to forward the message, and click  **Add recipient**.

The system displays the Choose a Contact dialog box.

3. Select the contact, and click **OK**.
4. Click  **Start recording** to record a voice message. Alternatively, you can click **Re-record** to re-record your voice message.

You can perform the following tasks:

- Click **High importance** to set the priority status of the voice message.
- Click **Private** to set the privacy status of the voice message.

5. Click **Send**.

Forwarding a message using a telephone

After sending the message and hanging up the receiver, you must close the Voice Compose and Compose New Message dialog boxes.

Compose New Message page description

Name	Description
To	The name or mailbox number of the person to whom you want to send the voice message. You can remove a person from the To list by clicking X for that person.
Subject	The subject of the voice message. You can change the subject of a voice message.
High importance	The priority status of the voice message. You can assign High importance as the priority status of a voice message.
Private	The privacy status of the voice message. You can mark the voice message as private.
Send	Sends the recorded voice message to the specified person.

Icon description

Icon	Name	Description
 or 	Communication type	Specifies the device to record and listen to the voice message. The options are: • Play/record through desktop • Play/record through telephone The system displays the icons corresponding to your selection.
	Add recipient	Adds recipients. The system displays the Choose a Contact dialog box. You can select a contact from the Enterprise contacts or Personal distribution list.
	Start recording	Records a voice message through your personal computer. The system displays Adobe Flash Player Settings dialog box and prompts you to confirm that you are using microphone. In the Adobe Flash Player Settings dialog box, click Allow . Speak your voice message into your microphone. When you finish, click Stop or remain quiet. The recording stops after 4 seconds of silence. After the recording stops, the system plays your voice message.
	Stop recording	Stops recording your voice message.

Button description

Button	Name	Description
	Message play slider	Plays the part of a message that you select to play. You can move the slider right or left to play an earlier or a later part of a message.
	Re-record	Re-records your voice message.
	Play	Plays the voice message you recorded.
	Pause	Pauses the voice message you are playing.
	Stop	Stops playing the voice message.

Deleting a message

Procedure

On the Messages page, perform one of the following steps:

- Click  **Delete** associated with the message that you want to delete.
- Click the voice message that you want to delete, and then click  **Delete** or press the **Delete** key on the keyboard.
- Right-click the voice message that you want to delete, and click **Delete**.
- Double-click the voice message that you want to delete. The system opens the Play message dialog box. Click  **Delete**.

The system deletes the selected voice messages from your mailbox.

Deleting multiple messages

Procedure

On the Messages page, press and hold the **Control** key on the keyboard, and click each voice message that you want to delete. When you finish selecting the voice messages, perform one of the following steps:

- Click  **Delete** or press the **Delete** key on the keyboard.
- Right-click one of the selected voice messages, and click **Delete**.

The system deletes the selected voice messages from your mailbox.

Changing the status of a message

About this task

Use this procedure to change the status of a voice message in your mailbox. Each voice message in your mailbox has a status of **played** or **unplayed**. When you receive a new voice message, Messaging Web Access displays the information for that message in **bold** font. The bold font indicates that you have not yet listened to or played this message. The status of this voice message is **unplayed**. After you play the voice message, the status of this message then changes to **played**.

Procedure

1. On the Messages page, right-click the voice message whose status you want to change .
2. From the pop-up menu, select the appropriate status option. The options are:
 - **Mark as unplayed**
 - **Mark as played**

Changing the subject of a message

Procedure

1. On the Messages page, right-click the voice message.
2. From the pop-up menu, click **Edit subject**.

The system displays the **Change subject** dialog box.
3. In the **Change to** field, specify the new subject.
4. Click **Save**.

Calling the sender of a message

Procedure

1. On the Messages page, select a voice message, and then click **Call sender**.

Alternatively, you can perform any of the following tasks:

 - Right-click the voice message, and then click **Call sender** from the pop-up menu.
 - Double-click the voice message. The system opens the Play message dialog box. Click  **More options**, and then click **Call sender** from the list.

Messaging displays the Call Sender dialog box.

2. Complete the phone details, and click **Call**.

Messaging calls your telephone.
3. When your telephone rings, lift the receiver and log in to your mailbox.

Messaging calls the voice message sender.

Note:

While listening to a voice message on Messaging Web Access on your desktop if you click **Call Sender**, the message continues to play even as Messaging calls the sender. To stop the voice message, press **Stop** or **Pause**. Or you can wait for the voice message to finish playing.

 Important:

After calling the sender and hanging up the receiver, you must close the Call Sender dialog box.

Chapter 3: Customizing Messaging Web Access

About User Preferences

User Preferences is a web-based tool to customize settings for Messaging.

 Note:

Some of these features may not be available in your organization. For details, contact your administrator.

Customizing User Preferences

About this task

Use this procedure to change your mailbox account preferences.

You can configure options for various Messaging features through the User Preferences webpage. For more information, see *Using Avaya Aura® Messaging* on the Avaya Support website: <http://support.avaya.com>.

Procedure

1. At the top of the Messaging Web Access window, click **Preferences**.
The system displays the User Preferences page.
2. Set your preferences in User Preferences. For more information, click **Help** at the top of the User Preferences page.
