PHONE

AVAYA

Experiences
That Matter

OmniSound®

Your Experience Matters.

Thank you for selecting another high-quality solution from Avaya. The Avaya B129 is a sleek, flexible and easy-to-use speakerphone. The B129 comes with dual connectivity that gives you the freedom to connect via Bluetooth® or USB to your computer or mobile device and virtually any voice conferencing application. The Avaya B129 uses our unique OmniSound®-technology to provide outstanding audio quality—so you can give your customers and co-workers even more experiences that matter.

BLUETOOTH®

INSTRUCTIONS

Note: Pairing and reconnecting can also be achieved using NFC. Simply tap your NFC-compliant device on the Avaya B129 NFC-tag.

To connect the Avaya B129 to your laptop or mobile device, first make sure that they are paired. Pairing is only necessary when connecting for the first time—and after that, you can always simply reconnect.

PAIRING

1. Press the Bluetooth® (⌘) button for two seconds.
2. Start a search for Bluetooth®-devices on your mobile device.
3. Select Avaya B129 in the list of found devices. Pairing will be completed within a few seconds.

RECONNECT

1. Make sure Bluetooth® is enabled on your mobile device. Press the Bluetooth® (⌘) button on the Avaya B129 once. Reconnection will be completed within a few seconds.
