

AVAYA Intuity AUDIX LX
Release 2.0
Upgrade Checklist

Release 2.0
May 2007

Notice

While reasonable efforts were made to ensure that the information in this document was complete and accurate at the time of printing, Avaya Inc. can assume no liability for any errors. Changes and corrections to the information in this document might be incorporated in future releases.

Documentation disclaimer

Avaya Inc. is not responsible for any modifications, additions, or deletions to the original published version of this documentation unless such modifications, additions, or deletions were performed by Avaya. Customer and/or End User agree to indemnify and hold harmless Avaya, Avaya's agents, servants and employees against all claims, lawsuits, demands and judgments arising out of, or in connection with, subsequent modifications, additions or deletions to this documentation to the extent made by the Customer or End User.

Link disclaimer

Avaya Inc. is not responsible for the contents or reliability of any linked Web sites referenced elsewhere within this documentation, and Avaya does not necessarily endorse the products, services, or information described or offered within them. We cannot guarantee that these links will work all the time and we have no control over the availability of the linked pages.

Warranty

Avaya Inc. provides a limited warranty on this product. Refer to your sales agreement to establish the terms of the limited warranty. In addition, Avaya's standard warranty language, as well as information regarding support for this product, while under warranty, is available through the Avaya Support Web site:

<http://www.avaya.com/support>

License

USE OR INSTALLATION OF THE PRODUCT INDICATES THE END USER'S ACCEPTANCE OF THE TERMS SET FORTH HEREIN AND THE GENERAL LICENSE TERMS AVAILABLE ON THE AVAYA WEB SITE <http://support.avaya.com/LicenseInfo> ("GENERAL LICENSE TERMS"). IF YOU DO NOT WISH TO BE BOUND BY THESE TERMS, YOU MUST RETURN THE PRODUCT(S) TO THE POINT OF PURCHASE WITHIN TEN (10) DAYS OF DELIVERY FOR A REFUND OR CREDIT.

Avaya grants End User a license within the scope of the license types described below. The applicable number of licenses and units of capacity for which the license is granted will be one (1), unless a different number of licenses or units of capacity is specified in the Documentation or other materials available to End User. "Designated Processor" means a single stand-alone computing device. "Server" means a Designated Processor that hosts a software application to be accessed by multiple users. "Software" means the computer programs in object code, originally licensed by Avaya and ultimately utilized by End User, whether as stand-alone Products or pre-installed on Hardware. "Hardware" means the standard hardware Products, originally sold by Avaya and ultimately utilized by End User.

License type(s)

Designated System(s) License (DS). End User may install and use each copy of the Software on only one Designated Processor, unless a different number of Designated Processors is indicated in the Documentation or other materials available to End User. Avaya may require the Designated Processor(s) to be identified by type, serial number, feature key, location or other specific designation, or to be provided by End User to Avaya through electronic means established by Avaya specifically for this purpose.

Concurrent User License (CU). End User may install and use the Software on multiple Designated Processors or one or more Servers, so long as only the licensed number of Units are accessing and using the Software at any given time. A "Unit" means the unit on which Avaya, at its sole discretion, bases the pricing of its licenses and can be, without limitation, an agent, port or user, an e-mail or voice mail account in the name of a person or corporate function (e.g., webmaster or helpdesk), or a directory entry in the administrative database utilized by the Product that permits one user to interface with the Software. Units may be linked to a specific, identified Server.

Named User License (NU). Customer may: (i) install and use the Software on a single Designated Processor or Server per authorized Named User (defined below); or (ii) install and use the Software on a Server so long as only authorized Named Users access and use the Software. "Named User," means a user or device that has been expressly authorized by Avaya to access and use the Software. At Avaya's sole discretion, a "Named User" may be, without limitation, designated by name, corporate function (e.g., webmaster or helpdesk), an e-mail or voice mail account in the name of a person or corporate function, or a directory entry in the administrative database utilized by the Product that permits one user to interface with the Product.

Shrinkwrap License (SR). With respect to Software that contains elements provided by third party suppliers, End User may install and use the Software in accordance with the terms and conditions of the applicable license agreements, such as "shrinkwrap" or "clickwrap" license accompanying or applicable to the Software ("Shrinkwrap License"). The text of the Shrinkwrap

License will be available from Avaya upon End User's request (see "Third-party Components" for more information).

Copyright

Except where expressly stated otherwise, the Product is protected by copyright and other laws respecting proprietary rights. Unauthorized reproduction, transfer, and/or use can be a criminal, as well as a civil, offense under the applicable law.

Third-party components

Certain software programs or portions thereof included in the Product may contain software distributed under third party agreements ("Third Party Components"), which may contain terms that expand or limit rights to use certain portions of the Product ("Third Party Terms"). Information identifying Third Party Components and the Third Party Terms that apply to them is available on the Avaya Support Web site:

<http://support.avaya.com/ThirdPartyLicense/>

Preventing toll fraud

"Toll fraud" is the unauthorized use of your telecommunications system by an unauthorized party (for example, a person who is not a corporate employee, agent, subcontractor, or is not working on your company's behalf). Be aware that there can be a risk of toll fraud associated with your system and that, if toll fraud occurs, it can result in substantial additional charges for your telecommunications services.

Avaya fraud intervention

If you suspect that you are being victimized by toll fraud and you need technical assistance or support, call Technical Service Center Toll Fraud Intervention Hotline at +1-800-643-2353 for the United States and Canada. For additional support telephone numbers, see the Avaya Support Web site:

<http://www.avaya.com/support>

Trademarks

Avaya and the Avaya logo are either registered trademarks or trademarks of Avaya Inc. in the United States of America and/or other jurisdictions.

All other trademarks are the property of their respective owners.

Downloading documents

For the most current versions of documentation, see the Avaya Support Web site:

<http://www.avaya.com/support>

Avaya support

Avaya provides a telephone number for you to use to report problems or to ask questions about your product. The support telephone number is 1-800-242-2121 in the United States. For additional support telephone numbers, see the Avaya Support Web site:

<http://www.avaya.com/support>

Upgrade Procedure Checklist

This upgrade procedure checklist provides descriptions of the required procedures, in sequence, to use when you upgrade an Avaya Intuity AUDIX LX system from Release 1.1 to Release 2.0. You can use the *Intuity AUDIX LX R2.0 Installation Guide* for first-time installation processes, backup procedures, or hardware replacement, if needed. When referenced to other documentation, see the Intuity AUDIX LX documentation CD.

Note:

If you need to install a feature for the customer on an ALT system, contact your project manager to verify the requirements and contact your remote support center.

The following table provides a checklist for a system upgrade including integration with most switches.

Task	Description	Comments and Screens	
1.	Review <i>Installing an S3210R server</i> if necessary.	This section includes: <ul style="list-style-type: none"> 1 Site preparation <ul style="list-style-type: none"> – Environmental considerations – <i>Customer-provided cabinet requirements</i> – Installation area considerations – Weight and space considerations – Power requirements – <i>Grounding requirements</i> 	
2.	Ensure the Intuity Audix LX 2.0 disk is available.		
3.	Ensure a full backup of the IALX1.1 system exists or perform a full backup.	Go to the Installation Guide or go to the documentation CD. Work with the System Administrator to notify users if necessary.	

Upgrade Procedure Checklist

Task	Description	Comments and Screens	
4.	Document data on network addressing.	Go to the Intuity AUDIX LX menu and select: <i>Server Administration>TCP/IP Network Configuration</i> . Copy the information presented: Host Name, Default Gateway Address, Primary Name + Domain, IP Address, Subnet Mask, Aliases, Network Media Type, Enable DNS, Domain Name, Name Server, and Search Order.	
5.	If necessary, verify that the switch has been administered in preparation for the upgraded system.	See the switch administrator. Required switch administration is listed in Initial Switch Administration on the documentation CD.	
6.	Determine if you need to notify the LAN administrator to arrange for administration of the LAN for the system. Note: Avaya is not responsible for the installation, administration, or test of communications between customer PCs and the LAN.	See the LAN administrator. Note: LANs may be administered prior to your arrival on site.	
7	If necessary, remove any IALX1.1 hardware or install any IALX 2.0 hardware.	Replace the CD drive with the IALX2.0 DVD+RW drive, if necessary. Or, add additional memory if required. Refer to the <i>Installation Guide</i> for instructions.	
8.	Insert the Intuity AUDIX LX 2.0 disk in the DVD drive.	Power down and reboot. Work with the System Administrator to notify users if necessary. Note: This assumes that the IALX2.0 hardware arrived on site without any software installed. If software is installed, go to the <i>Configure Network Addressing</i> step and then the <i>Restore</i> step	
9.	Type <i>install</i> at the installation screen.	The base Linux packages are installed, which takes about 15 minutes.	
10.	When prompted, remove the Intuity AUDIX LX 2.0 disk.		
11.	Reboot the system.		
12	Complete the date and time dialog box that is presented		

Task	Description	Comments and Screens	
13.	Log in as <i>root</i> and press Enter.	Note: No password to <i>root</i> is required. You are placed at the root prompt #	
14.	Insert the Intuity AUDIX LX 2.0 disk in the DVD drive and type <i>autoinstall</i> .	The installation script prompts you for <i>root</i> , <i>sroot</i> , <i>tsc</i> , <i>craft</i> , and <i>craftppp</i> passwords. After entering a password, the system installs the messaging software, which takes about 10 minutes.	
15.	Remove the Intuity AUDIX LX 2.0 disk when prompted. Reboot the system.	Do NOT log in at the initial login prompt. Wait for 30 seconds for <i>Automatically Starting the Voice System</i> . Wait for the voice system to finish startup.	
16.	Log in as <i>sroot</i> or <i>craft</i> .	Use the same password as used in Task 13.	
17.	Start the X-Windows system to display the web administration screens.	If logged in as <i>sroot</i> : Type <i>webadmin</i>	
18.	Enter network addressing data.	Select: <i>Server Administration>Configure Network Addressing</i> Enter the information documented in Step 4: Host Name, Default Gateway Address, Primary Name + Domain, IP Address, Subnet Mask, Aliases, Network Media Type, Enable DNS, Domain Name, Name Server, and Search Order	
19.	Select <i>Utilities>Stop Messaging</i> in the left menu column.	Accept the default time of 180 seconds. There are currently no active calls. Wait for the voice system to completely stop.	
20.	Insert the Intuity AUDIX LX 2.0 disk into the DVD drive and select <i>Software Installation</i> in the left column.	Select <i>CD/DVD</i> as the installation medium.	
21.	Select a switch integration package and select any additional language sets.	Determine if the customer uses other languages in addition to English.	
22.	Click the <i>Proceed with Installation</i> button at the bottom of the screen.	The switch integration and additional language sets are installed.	

Upgrade Procedure Checklist

Task	Description	Comments and Screens	
23.	Remove the DVD and reboot the system.	Click the <i>Reboot</i> button at the bottom of the screen. Note: If you are prompted to log in again, the web server has expired. Log in again and select <i>Reboot Server</i> from the menu.	
24.	Insert the Backup CD into the DVD drive.	Select <i>Restore</i> from the menu. Follow the prompts. The restore process will be lengthy. The system must convert the database files to the Intuity AUDIX LX 2.0 format. Errors called <i>dconstruct-111</i> may occur. Ignore these errors.	
25.	Remove the Backup CD from the DVD drive and reboot the server after restore is completed.		
26.	Perform acceptance testing.	After the system has completely rebooted and the voice system has completely restarted, begin acceptance tests. Call the lead number of the hunt group. The system should respond, <i>Welcome to AUDIX.</i> Leave and retrieve a test message. Check for proper MWI operation. Check for any missing subscribers. Complete any other tests you want to use to verify system operation. Note: A complete <i>System Acceptance Test</i> checklist, should you need one, is provided in the <i>Installation Guide</i> .	
27.	Perform a System Backup.	Select <i>Backup and Restore</i> from the menu. Important: Avaya has tested and strongly recommends using Verbatim DVD+RW single-sided 1X-4X 4.7 GB media to back up system data. Using DVD+RW media from other manufacturers may cause problems backing up or restoring system data. An average of 70,000 subscribers with voiced names can be stored per DVD during an attended backup.
