

Migrating from AUDIX Voice Power Lodging

This file lists the tasks required to migrate the data from any one of the following AUDIX Voice Power Lodging releases to the Avaya Intuity system:

- Release 1.1
- Release 3

The tasks are grouped into these general areas:

- Preparing for the Data Transfer (page 1)
- Transferring the Data (page 2)
- Completing the Migration (page 2)

Migration Checklist

To migrate from an AUDIX Voice Power Lodging system to the Avaya Intuity system:

Area	Task
Preparing for the Data Transfer	1. Gather the materials and information needed to complete the migration.
	2. Install the Lodging feature software.
	3. Format diskettes.
	4. Copy the CPIO utility to the Intuity AUDIX.

Area	Task
Transferring the Data	5. Create a migration software diskette.
	6. Backup the AUDIX Voice Power Lodging data.
	7. Run the migration.
	8. Check the error file.
Completing the Migration	9. Administer the switch.
	10. Remove the migration software.
